This ISO 14001 2015 lead auditor course is one of the top Continuous Improvement Training Courses. It takes

ISO 14001 Environmental Management System from Plan Do Check Act perspective.

Understanding The ISO Standard

ISO 14001 is a set of standards for environmental management system EMS that is also referred to as an international standard.

It's a set of guidelines for organizations to manage their environmental performance and activities in order to protect the environment.

ISO 14001:2015 is the most recent version of the ISO 14001 standard, published by the International Organization for Standardization ISO. The previous version, ISO 14001:2009, was published in 2009. It has been updated with new requirements and changes in terms.

The Continuous Improvement Process

The continuous improvement process is a process that ensures a company will always be improving. It is a four-step process that includes plan, do, check and act. This process has been used in the ISO standards for many years.

The Plan phase is where the company has to develop goals and objectives for the project they are working on. While the Do phase is where they will work on implementing their plan to reach their objectives. The Check phase is where they evaluate how well they are doing at meeting their objectives. The act phase is where They take action to make changes based on what we learned in the previous phases.

This is where They actually put knowledge into practice and see if our plan worked.

This phase includes the following steps:

- 1 Implement the change,
- 2 Monitor and measure what happens, and
- 3 Evaluate whether or not the change was successful.
