- Topic 2: Sustainability in Procurement
- Topic 3: Managing Complex Procurement Projects
- Topic 4: Procurement Innovation and Technology
- Topic 5: Final Review and Best Practices
- Reflection & Review

How This Course is Different from Other Cost Estimation Courses:

The course distinguishes itself by offering an in-depth, hands-on approach to procurement that goes beyond traditional methodologies. Unlike other courses that focus solely on cost-cutting, this program integrates advanced strategies for supplier management, contract negotiation, and procurement data analysis to drive both cost efficiency and value creation. Real-life scenarios and industry-specific case studies enable participants to apply what they learn in their own professional environments. This course is designed to enhance the strategic thinking of procurement professionals, giving them the tools to align procurement with broader business goals and make data-driven decisions. By the end of the course, attendees will have the practical knowledge and confidence to optimize procurement processes, negotiate better contracts, and improve overall supply chain efficiency.
