

Water Hammer and Surge Analysis Training Course

09 - 13 Jun 2025
Milan

Water Hammer and Surge Analysis Training Course

Ref.: 36280_259163 **Date:** 09 - 13 Jun 2025 **Location:** Milan **Fees:** 4800 **Euro**

Course Overview:

The course is a complete program designed to provide in-depth knowledge and practical skills in understanding and mitigating water hammer and surge phenomena in pipelines. This course covers essential topics such as water hammer, surge analysis, pipeline flow analysis, steady and unsteady flow in pipelines, inertia in fluid mechanics, elasticity of fluid and pipe wall, and resonance in pipelines. Participants will learn the application of the Joukowski equation, numerical simulation of water hammer, accurate numerical surge analysis, and pipeline forces analysis. The course also delves into computerised surge analysis, manual calculations for surge control, energy storage in pipelines, and the use of air vessels, standpipes, surge tanks, flywheels, air valves, actuated valves, and swing check valves.

Target Audience:

- Pipeline Engineers
- Maintenance Managers
- Project Managers
- Pipeline Operators
- Water Resource Managers
- Fluid Mechanics Specialists

Targeted Organizational Departments:

- Engineering Departments
- Maintenance Teams
- Project Management Offices
- Operations Departments
- Safety and Compliance Units

Targeted Industries:

- Oil and Gas
- Water Supply and Treatment
- Energy
- Manufacturing
- Environmental Engineering

Course Offerings:

By the end of this course, participants will be able to:

- Analyse and mitigate water hammer and surge phenomena.
- Apply the Joukowski equation for surge analysis.
- Conduct numerical simulation and computerised surge analysis.
- Implement manual calculations and surge control measures.
- Design and utilize energy storage solutions in pipelines.
- Evaluate and apply various types of valves for surge control.
- Perform detailed pipeline forces analysis.
- Apply practical surge control measures in real-world scenarios.

Training Methodology:

This course employs a blend of interactive learning methods, including case studies, group discussions, hands-on exercises, and simulations. Participants will engage in real-world scenarios to analyse and mitigate water hammer and surge phenomena. The course includes feedback sessions and practical applications to reinforce learning and ensure participants gain a thorough understanding of the concepts and techniques covered.

Course Toolbox:

- Workbooks
- Reading Materials
- Online Resources
- Checklists and Templates
- Case Study Examples

Course Agenda:

Day 1: Introduction and Fundamentals of Water Hammer

- **Topic 1:** Introduction to Water Hammer and Surge Analysis
- **Topic 2:** General - The Problem of Water Hammer
- **Topic 3:** Steady and Unsteady Flow in a Pipeline
- **Topic 4:** Fundamentals of Water Hammer
- **Topic 5:** Inertia in Fluid Mechanics
- **Topic 6:** Elasticity of Fluid and Pipe Wall
- **Reflection & Review:** Reflecting on the key concepts of water hammer and surge analysis introduced today.

Day 2: Advanced Water Hammer Concepts

- **Topic 1:** Resonance in Pipelines
- **Topic 2:** The Joukowski Equation
- **Topic 3:** Scope of the Joukowski Equation
- **Topic 4:** Numerical Simulation of Water Hammer
- **Topic 5:** Accuracy of Numerical Surge Analysis
- **Topic 6:** Forces Acting on Pipelines as a Result of Water Hammer
- **Reflection & Review:** Reviewing advanced concepts and their practical implications.

Day 3: Surge Analysis Techniques

- **Topic 1:** Computerised Surge Analysis
- **Topic 2:** Technical Procedure for Surge Analysis
- **Topic 3:** Interaction between Ordering Party and Surge Analyst
- **Topic 4:** Advantages of Rules of Thumb and Manual Calculations
- **Topic 5:** Energy Storage in Pipelines
- **Topic 6:** Air Vessels for Surge Control
- **Reflection & Review:** Evaluating different surge analysis techniques and tools.

Day 4: Surge Control Measures

- **Topic 1:** Standpipes and One-Way Surge Tanks
- **Topic 2:** Flywheels in Fluid Systems
- **Topic 3:** Air Valves in Pipeline Systems
- **Topic 4:** Actuated Valves for Surge Control
- **Topic 5:** Swing Check Valves in Pipelines
- **Topic 6:** Case Study: Long-Distance Water Supply System
- **Reflection & Review:** Assessing surge control measures and their effectiveness.

Day 5: Practical Applications and Case Studies

- **Topic 1:** Case Study: Stormwater Conveyance Pipeline
- **Topic 2:** Model Parameters for Surge Analysis
- **Topic 3:** Calculation of Actual Duty Data and First Results
- **Topic 4:** Implementation of Surge Control Measures
- **Topic 5:** Advanced Water Hammer Case Studies
- **Topic 6:** Additional Literature and Resources for Further Learning
- **Reflection & Review:** Summarizing the course learnings and practical applications.

How This Course is Different from Other Water Hammer and Surge Analysis Courses:

The course sets itself apart by offering a complete and practical approach to understanding and mitigating water hammer and surge phenomena in pipelines. This course combines theoretical knowledge with hands-on exercises, real-world case studies to provide participants with the skills

and confidence to apply surge analysis techniques in their professional roles. The inclusion of detailed numerical simulations, accurate surge analysis methods, and a focus on both manual and computerised surge control measures ensures that participants gain a holistic understanding of the subject. Additionally, the course covers a wide range of surge control techniques, from energy storage solutions to various types of valves, making it an all-encompassing training program for professionals in the field.

WHO WE ARE

Agile Leaders is a renowned training center with a team of experienced experts in vocational training and development. With 20 years of industry experience, we are committed to helping executives and managers replace traditional practices with more effective and agile approaches.

OUR VISION

We aspire to be the top choice training provider for organizations seeking to embrace agile business practices. As we progress towards our vision, our focus becomes increasingly customer-centric and agile.

OUR MISSION

We are dedicated to developing value-adding, customer-centric agile training courses that deliver a clear return on investment. Guided by our core agile values, we ensure our training is actionable and impactful.

WHAT DO WE OFFER

At Agile Leaders, we offer agile, bite-sized training courses that provide a real-life return on investment. Our courses focus on enhancing knowledge, improving skills, and changing attitudes. We achieve this through engaging and interactive training techniques, including Q&As, live discussions, games, and puzzles.

Gamified and Interactive Training

We understand that training delivery can be challenging, both online and offline. To ensure engagement and achieve learning objectives, we have developed our own activities and collaborated with industry-leading solutions to gamify our training sessions. This approach increases interaction levels and guarantees effective learning outcomes.

Our Training Categories

We cover a wide range of training categories to cater to different needs and interests

- Branding, Marketing, Customer Relations, & Sales Programs
- Finance and Accounting Programs
- Human Resources Management Programs
- Management & Leadership Programs
- Political & Public Relations Programs
- Project Management Programs
- Quality & Process Management
- Self-Development Programs

Join Agile Leaders today and embark on a transformative journey towards becoming a more agile and effective leader. Experience our customer-centric approach, actionable training, and guaranteed return on investment. Let us help you unleash your full potential in the dynamic business landscape.

Where to Find Us

You can join our training programs at our centers located in

We also offer online training sessions through the Zoom platform.
