

Advanced Ethical Hacking & Penetration Testing Certified Training Course

14 - 18 Jul 2026
Dubai - Marriott Hotel Al Jaddaf, Dubai

Advanced Ethical Hacking & Penetration Testing Certified Training Course

Ref.: 103600311_32634 **Date:** 14 - 18 Jul 2026 **Location:** Dubai - Marriott Hotel Al Jaddaf, Dubai **Fees:** 4500 **Euro**

Course Overview

In today's digital landscape, organizations face increasing cyber threats that can compromise sensitive data and critical systems. Ethical hacking and penetration testing are essential cybersecurity strategies to identify and mitigate security vulnerabilities before malicious hackers can exploit them. This cybersecurity training is designed for professionals seeking ethical hacker certification and hands-on experience in network security, web security testing, and cyber threat analysis.

Throughout this ethical hacking certification training, participants will master the latest methodologies, including OSSTMM penetration testing, PTES security assessment, and Kali Linux hacking techniques. The course also covers cybersecurity penetration testing training, web application security testing, and network vulnerability assessment, making it one of the best ethical hacking courses online.

By the end of this program, participants will be able to conduct penetration testing, simulate real-world attacks, and implement security countermeasures.

Target Audience

- Cybersecurity professionals
- IT security managers
- Network administrators and system engineers
- Software developers and web security testers
- Ethical hackers and security consultants
- Risk and compliance officers
- Law enforcement and forensic experts

Targeted Organizational Departments

- Cybersecurity and IT security teams
- Risk and compliance departments
- Software development teams
- Audit and governance units
- Incident response and forensics teams

Targeted Industries

- Finance and banking
- Healthcare and pharmaceuticals
- Government and defense
- E-commerce and retail
- Telecommunications
- Technology and software development

Course Offerings

By completing this advanced penetration testing course, participants will:

- Conduct ethical hacking assessments using Kali Linux hacking tools
- Perform penetration testing following OSSTMM and PTES security assessment standards
- Identify and exploit security vulnerabilities in web security testing
- Learn real-world penetration testing techniques for cyber threat analysis
- Implement network vulnerability assessment and IT security breach analysis
- Understand how to conduct penetration testing and analyze results effectively
- Prepare for the certified ethical hacker exam with hands-on training

Training Methodology

This course follows a practical, hands-on approach, ensuring participants gain real-world experience. Training methodologies include:

- Interactive lectures and case studies covering cybersecurity frameworks and hacking methodologies
- Live hacking demonstrations using Kali Linux hacking tools for ethical hacking practical labs
- Hands-on penetration testing labs conducting cybersecurity penetration testing training
- Simulated cyber attacks replicating real-world cyber threats in a controlled environment

Course Toolbox

- Cybersecurity ebooks and reading materials
- Kali Linux hacking tools and penetration testing frameworks
- Online cybersecurity bootcamp resources
- Web application security testing toolkits
- Network security scanning and vulnerability assessment software
- Templates for cybersecurity risk assessment reporting
- Checklists for penetration testing execution

Course Agenda

Day 1: Foundations of Ethical Hacking and Penetration Testing

- **Topic 1:** Introduction to ethical hacking and cybersecurity principles
- **Topic 2:** Penetration testing methodologies and frameworks OSSTMM & PTES
- **Topic 3:** Network security fundamentals and reconnaissance techniques
- **Topic 4:** Cryptography basics and encryption techniques in cybersecurity
- **Topic 5:** Kali Linux fundamentals and penetration testing environment setup
- **Topic 6:** Legal and ethical considerations in ethical hacking
- **Reflection & Review:** Key takeaways from ethical hacking fundamentals and penetration testing methodologies

Day 2: Information Gathering and Vulnerability Assessment

- **Topic 1:** Passive reconnaissance and open-source intelligence OSINT
- **Topic 2:** Active reconnaissance and network scanning techniques
- **Topic 3:** Identifying and mapping security vulnerabilities in networks and systems
- **Topic 4:** Web application security testing and common vulnerabilities
- **Topic 5:** Cyber threat modeling and risk assessment strategies
- **Topic 6:** OSSTMM penetration testing framework application
- **Reflection & Review:** Analysis of reconnaissance techniques and vulnerability assessment

Day 3: Exploitation and Attack Strategies

- **Topic 1:** Threat modeling and attack surface analysis
- **Topic 2:** Evading intrusion detection and prevention systems
- **Topic 3:** Server-side exploitation techniques and privilege escalation
- **Topic 4:** Client-side attacks, phishing, and social engineering
- **Topic 5:** Web application attacks, SQL injection, and cross-site scripting XSS
- **Topic 6:** Wireless network hacking and ethical WiFi penetration testing
- **Reflection & Review:** Reviewing penetration testing results and attack strategies

Day 4: Post-Exploitation, Maintaining Access, and Reporting

- **Topic 1:** Covering tracks and removing penetration testing artifacts
- **Topic 2:** Establishing and maintaining persistent access
- **Topic 3:** Privilege escalation techniques and lateral movement
- **Topic 4:** File transfer techniques and pivoting across compromised systems
- **Topic 5:** Generating professional penetration testing reports
- **Topic 6:** Best practices for mitigating discovered vulnerabilities
- **Reflection & Review:** Effective penetration testing reporting and remediation planning

Day 5: Practical Penetration Testing and Final Assessment

- **Topic 1:** Hands-on ethical hacking lab exercises and case studies
- **Topic 2:** Real-world penetration testing techniques and ethical hacking methodologies
- **Topic 3:** Cybersecurity risk assessment and security policy implementation
- **Topic 4:** Understanding certification requirements and ethical hacker certification process
- **Topic 5:** Certified ethical hacker exam preparation and practice scenarios
- **Topic 6:** Industry trends and future advancements in ethical hacking
- **Reflection & Review:** Final Q&A, recap of key concepts, and next steps in cybersecurity career

FAQ

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Basic knowledge of network security, operating systems, and IT security training is recommended. Experience with Kali Linux hacking or previous exposure to ethical hacking fundamentals is beneficial.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session lasts 4-5 hours, totaling 20-25 hours over five days, including practical labs and discussions.

What tools will be provided for the penetration testing labs?

While no software is directly provided, participants will be guided on using Kali Linux hacking tools, OSSTMM penetration testing frameworks, and web application security testing tools.

How This Course is Different from Other Ethical Hacking Courses

This course stands out due to its real-world penetration testing approach, focusing on hands-on ethical hacking practical labs and industry-recognized frameworks like OSSTMM and PTES security assessment. Unlike many best ethical hacking courses online, this training offers interactive cyber attack simulations, in-depth security vulnerability analysis, and preparation for the certified ethical hacker exam.

By the end of this program, participants will not only learn ethical hacking online but also develop the practical skills needed to defend against cyber threats. This is the best ethical hacking certification training for professionals looking to advance in cybersecurity penetration testing training and IT security breach analysis.

WHO WE ARE

Agile Leaders is a renowned training center with a team of experienced experts in vocational training and development. With 20 years of industry experience, we are committed to helping executives and managers replace traditional practices with more effective and agile approaches.

OUR VISION

We aspire to be the top choice training provider for organizations seeking to embrace agile business practices. As we progress towards our vision, our focus becomes increasingly customer-centric and agile.

OUR MISSION

We are dedicated to developing value-adding, customer-centric agile training courses that deliver a clear return on investment. Guided by our core agile values, we ensure our training is actionable and impactful.

WHAT DO WE OFFER

At Agile Leaders, we offer agile, bite-sized training courses that provide a real-life return on investment. Our courses focus on enhancing knowledge, improving skills, and changing attitudes. We achieve this through engaging and interactive training techniques, including Q&As, live discussions, games, and puzzles.
