## **FAQ:**

### **What specific qualifications or prerequisites are needed for participants before enrolling in the course?**

Participants should have a fundamental understanding of risk management principles or practical experience in financial institutions.

### **How long is each day's session, and is there a total number of hours required for the entire course?**

Each day's session lasts approximately 4-5 hours, totaling about 20-25 hours over the five-day course.

### **What's the difference between operational risk and enterprise risk management ERM?**

Operational risk specifically involves risks arising from internal processes, people, and systems or from external events, while ERM covers broader risks, including strategic, market, and financial risks.

## **How This Course is Different from Other ORM Courses:**

Unlike other operational risk management courses, this training emphasizes practical application integrated with the latest Basel Committee guidelines and regulatory compliance standards. Participants gain insights from actual industry scenarios, providing an applied understanding of ORM frameworks, risk appetite setting, incident data collection, scenario analysis, and capital modeling. By incorporating interactive discussions, practical exercises, and real-world case studies, attendees not only grasp theoretical concepts but also acquire actionable skills that are immediately applicable in financial institutions. Furthermore, the course uniquely fosters a deeper comprehension of key risk indicators and risk culture, essential for effective risk management and compliance in today's dynamic financial environment. Participants receive comprehensive preparation for recognized certification, ensuring they stand out in their professional field.
