FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Participants should have at least 2-3 years of experience in business operations, analytics, or management. Familiarity with data-driven decision-making is helpful but not required.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans five days, approximately 20-25 hours of instruction.

How does the Importance vs. Availability Matrix help in KPI shortlisting?

The matrix allows teams to visually prioritize KPIs based on their business value importance and ease of access to reliable data availability. This ensures effort is focused on feasible and high-impact KPIs.

How This Course is Different from Other KPI Courses:

This course stands apart from traditional programs by utilising the Results-Oriented KPI System ROKS framework, developed by Bernie Smith in "*KPI Checklists*." It combines structured checklists, hands-on stakeholder engagement, and data risk mitigation through FMEA, alongside SMED for streamlining processes.

Emphasising the creation of sustainable systems and the avoidance of common pitfalls, participants will learn to apply KPI development across departments. With practical templates, real business cases, and workshop-style sessions, this course focuses on actionable methods that address real-world challenges.
