Amman

# Mechanical Vibrations Theory and Application Training Course

**Ref.:** 36234\_41391 **Date:** 25 - 29 May 2026 **Location:** Amman **Fees:** 4100 **Euro**

## Mechanical Vibrations Theory and Application Training Course Overview:

The course is designed to provide a comprehensive understanding of the fundamental concepts and practical applications of mechanical vibrations. This course covers key topics such as vibration analysis, modeling techniques, SDOF Single Degree of Freedom and MDOF Multiple Degrees of Freedom systems, free vibration analysis, forced vibration studies, harmonic excitation, and vibration isolation techniques. Participants will explore advanced topics including transient vibration analysis, nonlinear vibrations, random vibrations, finite element method vibrations, and vibrations in continuous systems. By incorporating a blend of theoretical knowledge and hands-on applications, this course aims to enhance participants' skills in engineering vibrations, advanced vibration damping methods, and practical vibration isolation. The course is tailored to meet the needs of professionals seeking to improve their understanding of mechanical vibration applications in various engineering fields.

## Target Audience:

- Mechanical Engineers
- Vibration Analysts
- Maintenance Engineers
- Aerospace Engineers
- Automotive Engineers
- Civil Engineers
- Industrial Engineers

## Targeted Organizational Departments:

- Engineering Departments
- Maintenance Departments
- R&D Departments
- Quality Assurance

## Targeted Industries:

- Aerospace Industry
- Automotive Industry
- Manufacturing Industry
- Civil Engineering
- Power Generation
- Oil and Gas Industry

## Course Offerings:

By the end of this course, participants will be able to:

- Perform vibration analysis on mechanical systems
- Apply vibration modeling techniques to engineering problems
- Analyze free and forced vibrations in SDOF and MDOF systems
- Implement vibration isolation methods for various applications
- Utilize finite element methods for vibration studies
- Address challenges in transient and nonlinear vibrations
- Conduct random vibration analysis in practical scenarios

## Training Methodology:

The training methodology for the course includes a mix of interactive lectures, case studies, group discussions, and hands-on workshops. Participants will engage in real-world vibration analysis exercises, vibration isolation problem-solving sessions, and use advanced software tools for vibration modeling. The course emphasizes practical applications and encourages active participation through collaborative projects and feedback sessions. This approach ensures a deep understanding of the course material and the development of practical skills in mechanical vibrations.

## Course Toolbox:

- Course Workbooks
- Reading Materials and Textbooks
- Online Resources and Tutorials
- Checklists and Templates for Vibration Modeling

## Course Agenda:

## Day 1: Introduction to Mechanical Vibrations

- **Topic 1:** Fundamentals of Mechanical Vibrations
- **Topic 2:** Vibration Analysis Techniques
- **Topic 3:** Mathematical Modeling of Vibrations
- **Topic 4:** SDOF Systems Analysis
- **Topic 5:** MDOF Systems Overview
- **Reflection & Review:** Key Concepts and Applications

## Day 2: Free and Forced Vibrations

- **Topic 1:** Free Vibration Analysis
- **Topic 2:** Forced Vibration Studies
- **Topic 3:** Harmonic Excitation in Mechanical Systems
- **Topic 4:** Practical Vibration Isolation Techniques
- **Topic 5:** Advanced Vibration Damping Methods
- **Reflection & Review:** Practical Applications and Techniques

## Day 3: Transient and Nonlinear Vibrations

- **Topic 1:** Transient Vibration Analysis
- **Topic 2:** Nonlinear Vibrations
- **Topic 3:** Random Vibrations Techniques
- **Topic 4:** Finite Element Method Vibrations
- **Topic 5:** Vibrations in Continuous Systems
- **Reflection & Review:** Analysis and Applications

## Day 4: Advanced Vibration Topics

- **Topic 1:** Engineering Dynamics and Vibrations
- **Topic 2:** Advanced Vibration Damping Methods
- **Topic 3:** Practical Vibration Isolation Techniques
- **Topic 4:** Case Studies in Vibration Analysis
- **Reflection & Review:** Integrating Knowledge and Skills

## Day 5: Final Projects and Review

- **Topic 1:** Capstone Project Presentations
- **Topic 2:** Group Discussions on Vibration Applications
- **Topic 3:** Review of Key Concepts and Techniques
- **Topic 4:** Final Assessment and Feedback
- **Topic 5:** Course Wrap-Up and Certification
- **Reflection & Review:** Summary of Learning Outcomes

## **How This Course is Different from Other Maintenance and Engineering Courses:**

The course stands out by offering a balanced approach between theoretical knowledge and practical skills. Unlike other courses, this training provides extensive hands-on experience with vibration analysis software and real-world case studies. The course covers a wide range of topics, from basic vibration theory to advanced applications such as finite element method vibrations and nonlinear vibrations. Participants benefit from personalized feedback, interactive sessions, and a focus on practical applications, ensuring they leave with a comprehensive understanding of mechanical vibrations and their applications in various industries.

# WHO WE ARE

Agile Leaders is a renowned training center with a team of experienced experts in vocational training and development. With 20 years of industry experience, we are committed to helping executives and managers replace traditional practices with more effective and agile approaches.

## OUR VISION

We aspire to be the top choice training provider for organizations seeking to embrace agile business practices. As we progress towards our vision, our focus becomes increasingly customer-centric and agile.

## OUR MISSION

We are dedicated to developing value-adding, customer-centric agile training courses that deliver a clear return on investment. Guided by our core agile values, we ensure our training is actionable and impactful.

## WHAT DO WE OFFER

At Agile Leaders, we offer agile, bite-sized training courses that provide a real-life return on investment. Our courses focus on enhancing knowledge, improving skills, and changing attitudes. We achieve this through engaging and interactive training techniques, including Q&As, live discussions, games, and puzzles.
