## FAQ:

### **What specific qualifications or prerequisites are needed for participants before enrolling in the course?**

There are no strict prerequisites. However, professionals with a basic understanding of operations or business strategy will benefit the most from this course.

### **How long is each day's session, and is there a total number of hours required for the entire course?**

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans 10 days, approximately 40-50 hours of instruction.

### **What's the difference between lean operations and agile operations techniques?**

Lean operations focus on eliminating waste and streamlining processes, while agile operations techniques emphasize adaptability and responsiveness to change. Both approaches are integrated in this course to create a resilient and efficient operations strategy.

## **How This Course is Different from Other Strategic Operations Management Courses:**

This course stands out by integrating lean operations, agile techniques, and business process reengineering with a strategic focus on innovation and systems-based thinking. Unlike standard operations management programs, this course takes a holistic approach to operations strategy and performance, focusing on supply chain optimization, strategic outsourcing, cost-efficiency, and leadership in driving organizational transformation. It offers real-world, actionable strategies that empower participants to align their operations with organizational goals, implement sustainable practices, and lead innovation-driven change across industries.
