Treasury Ops & Cash Flow Mastery: Risk, Liquidity & ALM

Ref.: 103600480_70248 **Date:** 29 Jun - 10 Jul 2026 **Location:** Dubai - Marriott Hotel Al Jaddaf, Dubai **Fees:** 4500 **Euro**

Course Overview

This 6-day program delivers a comprehensive understanding of how banks manage treasury functions, liquidity, cash flow, and balance sheet strategies. The first three days build a solid theoretical foundation in treasury operations, financial risk management, liquidity forecasting, ALM, corporate funding, and treasury management systems. The final three days take place inside a major Dubai bank, where participants observe real-time treasury activities, including FX and money market dealing, intraday liquidity management, counterparty controls, hedge execution, and full trade-processing workflows. By interacting directly with treasury, risk, finance, and back-office teams, participants gain firsthand insight into operational processes, compliance practices, regulatory reporting, and ALCO decision-making. This combined learning experience ensures participants develop both the analytical knowledge and practical skills needed to operate effectively in real banking environments.

- Follow practical workflows from deal initiation to settlement
- Work with risk, finance, back office, and compliance teams in actual cases
- Participate in an ALCO-style session and interpret live dashboards
- Build a mini ALM report based on real data

Training Methodology

This program uses a hybrid applied-learning methodology that combines expert-led theoretical instruction with practical, real-world training inside a Dubai bank. Over the first three days, participants engage in focused classroom learning through interactive lectures, case studies, discussions, and hands-on exercises covering liquidity modeling, ALM techniques, treasury risks, and treasury systems. The final three days provide direct exposure to live treasury operations, allowing participants to observe dealing room activities, interact with treasury, risk, finance, and operations teams, and follow full workflows from deal initiation to settlement. Through guided simulations in liquidity forecasting, ALM stress testing, and decision-making, participants gain both the conceptual foundation and practical competence required for immediate application in their professional roles.

FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Participants are expected to have a basic understanding of finance, banking operations, or treasury-related functions. While prior treasury experience is beneficial, professionals working in finance, risk, accounting, or banking environments will be able to follow and apply the course content effectively, as it progresses from foundational concepts to advanced practical applications.

How long is each day's session, and what is the total course duration?

Each training day is typically structured to last between 4 to 5 hours, combining theoretical instruction with practical exercises and discussions. The full program is delivered over six days, resulting in approximately 24 to 30 hours of instruction, including both classroom learning and real-world exposure inside a banking environment.

What practical experience will participants gain during the course?

Participants will gain direct exposure to treasury operations by observing real dealing room activities, understanding transaction workflows from initiation to settlement, and interacting with treasury, risk, finance, and back-office teams. This hands-on experience enables them to connect theoretical knowledge with real banking practices, enhancing their ability to operate effectively in treasury and financial environments.

How This Course is Different From Other Treasury Operations & Cash Flow Mastery:

This course stands out because it goes far beyond traditional classroom-based treasury programs, offering a unique blend of advanced theoretical learning and immersive real-world practice inside an actual Dubai bank. Unlike standard courses that focus solely on concepts, this program provides participants with direct exposure to live treasury operations, allowing them to observe FX, money market, liquidity, and funding activities as they happen. Through hands-on interaction with treasury, risk, finance, and back-office teams, participants gain a comprehensive understanding of workflow integration, compliance controls, and practical decision-making processes. The course also incorporates real ALM tools, liquidity gap modeling, stress testing, and participation in an ALCO-style environment—giving learners an authentic experience of how banks manage risk, liquidity, and balance sheet strategy. This practical depth, combined with modern coverage of regulations such as LCR, NSFR, IRRBB, and IFRS 9, makes the program uniquely valuable for professionals seeking both technical mastery and operational expertise.
