Ref.: 103600556_73573 **Date:** 14 - 18 Dec 2026 **Location:** Rome **Fees:** 5700 **Euro**

Course Overview:

The Executive Leadership & Strategic Thinking Course is a comprehensive executive leadership training program grounded in both modern practice and established leadership research. Drawing from integrated models of executive leadership, this strategic thinking course equips participants with the ability to manage organizations holistically while aligning internal capabilities with external environmental demands.

The course reflects key findings from leadership research, emphasizing that executive leadership is fundamentally about managing the organization as a whole, setting long-term direction, and adapting strategy based on environmental interactions. Participants will explore how leadership differs across organizational levels, particularly how senior leaders operate with longer time horizons, greater complexity, and broader organizational impact.

This executive leadership development program combines leadership and strategy training with practical frameworks derived from conceptual complexity, behavioral complexity, strategic decision-making, and visionary leadership models. Participants will strengthen their ability to lead transformation, manage competing stakeholder demands, and drive sustainable organizational performance.

By integrating executive management training with real-world applications, this course develops leadership skills for senior managers, enabling them to navigate complexity, make strategic decisions, and lead organizations effectively in dynamic environments.

Training Methodology:

This Executive Leadership & Strategic Thinking Course uses a structured, research-based methodology that reflects real executive leadership challenges. The program integrates conceptual and empirical insights, ensuring participants can translate theory into practice.

Participants will engage in case studies based on executive-level scenarios, focusing on strategic decision-making training and long-term organizational planning. These exercises emphasize the complexity of executive roles, where leaders must balance internal management with external environmental adaptation.

Group workshops will simulate multi-level leadership challenges, allowing participants to practice leadership and strategy training techniques across organizational contexts. These sessions reflect the concept that executive leaders operate across multiple subsystems and must coordinate them effectively.

Interactive simulations will focus on strategic alignment, organizational change, and decision-making under uncertainty. Feedback sessions will provide individualized insights into leadership effectiveness and strategic thinking capabilities.

This blended approach ensures that executive leadership training is practical, measurable, and aligned with real-world executive performance requirements.

FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Participants should have prior leadership or managerial experience. The course is designed for professionals involved in executive leadership training, strategic planning, or decision-making roles.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans five days, approximately 20-25 hours of instruction.

Why do executive leadership roles require different skills compared to lower-level management?

Executive roles involve managing the entire organization, operating in complex environments, and making long-term strategic decisions, whereas lower-level roles focus on operational execution and shorter timeframes.

How This Course is Different from Other Executive Leadership & Strategic Thinking Courses:

This Executive Leadership & Strategic Thinking Course stands out by directly integrating validated leadership research into practical training. Unlike conventional programs, it is built on multiple leadership models, including conceptual complexity, behavioral complexity, strategic decision-making, and visionary leadership frameworks identified in executive leadership research .

The course emphasizes the real nature of executive work, including long-term planning, boundary-spanning activities, and managing organizational complexity. Participants gain not only theoretical knowledge but also structured methods for applying leadership and strategy training in real-world environments.

Another key differentiator is the focus on executive-level competencies such as cognitive capacity, strategic alignment, and leadership flexibility—critical factors linked to organizational performance.

By combining executive leadership development program principles with practical exercises and strategic frameworks, this course ensures measurable improvements in leadership effectiveness, making it a high-value solution for organizations seeking to develop strong, future-ready leaders.
