Milan

Telecommunications Network Specialist Training Course

Ref.: 103600618_78248 **Date:** 21 - 25 Dec 2026 **Location:** Milan **Fees:** 5700 **Euro**

Course Overview

The Telecommunications Network Specialist TNS Training Course is a comprehensive 5-day program designed to give participants a practical and structured understanding of modern telecommunications networks, services, technologies, and operations. The course is suitable for both technical and non-engineering professionals who need to understand how telecom networks function, how services are delivered, and how emerging technologies are shaping the industry.

Participants will explore Broadband Converged IP Telecom, Wireless Telecommunications, Mobile Network Fundamentals, Telecom Network Core and Edge, VoIP, SIP Trunking, MPLS, Carrier Networks, and Service Level Agreements SLAs. The course also covers essential network concepts such as OSI Layers, Protocol Stacks, LANs, VLANs, Ethernet, Optical Ethernet, IP Routing, Network Address Translation NAT, and IPv6.

Advanced topics such as 4G LTE, 5G Spectrum and Applications, Wi-Fi Security, Satellite Communications, telecom convergence, broadband technologies, regulatory requirements, network troubleshooting, and business attitudes in telecom are also integrated into the agenda. By the end of the course, participants will have the knowledge and confidence to support telecom projects, network operations, service planning, vendor coordination, and customer-focused telecom solutions.

Target Audience

- Telecom Engineers
- IBS Engineers
- RF Engineers
- Network Administrators
- IT Managers
- Technical Support Specialists
- Telecom Project Managers
- Network Analysts
- Business Development Managers
- Non-engineering professionals working with telecom services

Targeted Organizational Departments

- Information Technology
- Network Operations
- Technical Support
- Engineering
- Project Management Office
- Business Development
- Service Delivery
- Customer Operations

Targeted Industries

- Telecommunications
- IT Services
- Networking and Infrastructure
- Mobile Communications
- Internet Service Providers
- Government and Public Sector
- Enterprise IT
- Carrier and Wholesale Telecom Services

Course Offerings

By the end of this course, participants will be able to:

- Understand the fundamentals of Broadband Converged IP Telecom.
- Explain Wireless Telecommunications and Mobile Network Fundamentals.
- Describe Telecom Network Core, Edge, carrier networks, and service delivery models.
- Understand 4G LTE, 5G Spectrum, and key telecom applications.
- Apply core concepts of Wi-Fi Security and Satellite Communications.
- Explain VoIP, soft switches, SIP servers, SIP Trunking, PSTN, LECs, CLECs, and IXC.
- Interpret OSI Layers, Protocol Stacks, LANs, VLANs, Ethernet, and Optical Ethernet.
- Understand IP Networks, Routing, NAT, IPv6, MPLS, and Carrier Networks.
- Support telecom network design, management, troubleshooting, and service operations.
- Understand Telecom Equipment, residential, business, wholesale, and carrier services.
- Recognize telecom convergence, broadband trends, and future network developments.
- Apply telecom regulatory, compliance, SLA, and customer-focused business practices.

Training Methodology

The Telecommunications Network Specialist TNS Training Course uses a practical and interactive methodology to help participants understand complex telecom concepts in a clear and workplace-focused way. The course combines instructor-led explanations, simplified technical demonstrations, telecom service examples, case studies, group discussions, and scenario-based exercises.

Participants will work through real-world telecom situations involving broadband services, mobile networks, VoIP implementation, routing issues, carrier interconnection, SLA management, regulatory considerations, and customer service challenges. The methodology is designed to support both technical and non-engineering participants by translating network concepts into practical business and operational applications.

The training also includes guided discussions, problem-solving activities, knowledge checks, telecom terminology reviews, and practical exercises related to network design, troubleshooting, service delivery, and future telecom trends.

Course Toolbox

- Comprehensive telecom frameworks and manuals
- Network design and service management checklists
- Telecom terminology reference sheets
- SLA and carrier service templates
- Troubleshooting and network review guides
- Case studies on telecom implementation and convergence
- Interactive learning activities and simulations

Course Agenda

Day 1: Telecommunications Foundations and Network Architecture

- **Topic 1:** Overview of the Telecommunications Network Specialist role and telecom industry structure
- **Topic 2:** Fundamentals of Broadband Converged IP Telecom and modern service delivery
- **Topic 3:** Telecom for non-engineers: key terms, technologies, and business applications
- **Topic 4:** Understanding Telecom Network Core, Edge, access networks, and carrier infrastructure
- **Topic 5:** Basics of Wireless Telecommunications, radio access, coverage, and mobility
- **Topic 6:** Telecom Equipment, residential services, business services, and wholesale telecom models
- **Reflection & Review:** Review of telecom fundamentals, network layers, and service categories

Day 2: Mobile, Wireless, Broadband, and Satellite Communications

- **Topic 1:** Mobile Network Fundamentals: cells, radio access networks, backhaul, and mobility management
- **Topic 2:** 4G LTE architecture, service capabilities, network elements, and practical use cases
- **Topic 3:** 5G Spectrum, applications, network slicing, low latency, and enterprise connectivity
- **Topic 4:** Wi-Fi Security Essentials, wireless risks, access control, and secure network practices
- **Topic 5:** Satellite Communications, coverage models, remote connectivity, and operational use cases
- **Topic 6:** Broadband technologies, telecom convergence, and future trends in broadband services
- **Reflection & Review:** Group discussion on mobile, wireless, broadband, and satellite applications

Day 3: Voice Services, Protocols, and Telecom Interconnection

- **Topic 1:** Fundamentals of Voice over IP, voice traffic, call signaling, and packet-based voice services
- **Topic 2:** VoIP soft switches, SIP servers, call control, and voice service platforms
- **Topic 3:** SIP Trunking, enterprise voice connectivity, interoperability, and service considerations
- **Topic 4:** PSTN, analog voiceband, legacy voice services, and migration to IP-based voice
- **Topic 5:** LECs, CLECs, IXCs, carrier connections, and telecom interconnection models
- **Topic 6:** OSI Layers, Protocol Stacks, and how telecom protocols support service delivery
- **Reflection & Review:** Case study review on VoIP, SIP Trunking, and carrier interconnection

Day 4: IP Networks, Ethernet, Routing, MPLS, and Carrier Services

- **Topic 1:** LAN Fundamentals, enterprise networks, switching concepts, and internal connectivity
- **Topic 2:** VLANs and Ethernet Technologies for segmentation, traffic control, and service design
- **Topic 3:** Optical Ethernet, fiber-based connectivity, metro Ethernet, and high-capacity networks
- **Topic 4:** IP Networks and Routing Fundamentals for telecom and enterprise service environments
- **Topic 5:** Network Address Translation, IPv6 implementation, addressing, and migration considerations
- **Topic 6:** MPLS, Carrier Networks, SLA management, and service performance measurement
- **Reflection & Review:** Practical review of routing, addressing, carrier services, and SLA scenarios

Day 5: Telecom Operations, Compliance, Troubleshooting, and Business Mindset

- **Topic 1:** Best Practices in Telecom Network Management, monitoring, availability, and service reliability
- **Topic 2:** Troubleshooting common telecom issues across voice, data, wireless, broadband, and carrier services
- **Topic 3:** Telecom regulations, compliance requirements, operational impact, and regulatory change readiness
- **Topic 4:** Case studies in telecom implementation, convergence, regulatory compliance, and service improvement
- **Topic 5:** Future-proofing telecom networks through technology planning, scalability, and service innovation
- **Topic 6:** Business attitude in telecom: communication, leadership, customer focus, strategic thinking, and adaptability
- **Reflection & Review:** Final knowledge review, workplace application discussion, and course completion

How This Course is Different

The Telecommunications Network Specialist TNS Training Course is different because it combines telecom fundamentals, advanced network technologies, carrier services, compliance, troubleshooting, and business application into one practical 5-day program. Instead of focusing only on engineering theory, the course explains complex telecom concepts in a clear and accessible way for both technical and non-engineering professionals.

The agenda covers essential and modern telecom topics, including Broadband Converged IP Telecom, 4G LTE, 5G Spectrum, Wi-Fi Security, Satellite Communications, VoIP, SIP Trunking, MPLS, IPv6, Carrier Networks, and Service Level Agreements. It also includes telecom equipment, wholesale services, convergence, broadband trends, regulatory requirements, and customer-focused business practices.

Participants gain practical knowledge that can be applied directly to telecom operations, project coordination, service delivery, vendor discussions, customer solutions, and network management.

WHO WE ARE

Agile Leaders is a renowned training center with a team of experienced experts in vocational training and development. With 20 years of industry experience, we are committed to helping executives and managers replace traditional practices with more effective and agile approaches.

OUR VISION

We aspire to be the top choice training provider for organizations seeking to embrace agile business practices. As we progress towards our vision, our focus becomes increasingly customer-centric and agile.

OUR MISSION

We are dedicated to developing value-adding, customer-centric agile training courses that deliver a clear return on investment. Guided by our core agile values, we ensure our training is actionable and impactful.

WHAT DO WE OFFER

At Agile Leaders, we offer agile, bite-sized training courses that provide a real-life return on investment. Our courses focus on enhancing knowledge, improving skills, and changing attitudes. We achieve this through engaging and interactive training techniques, including Q&As, live discussions, games, and puzzles.
