

10-Day Retirement Scheme Management & Sustainability Masterclass

10-Day Retirement Scheme Management & Sustainability Masterclass

Course Overview:

This course is a practical, management-focused program designed to strengthen the capabilities of professionals responsible for overseeing and operating retirement schemes. The course concentrates on how retirement schemes are managed in practice, covering governance structures, fiduciary responsibility, compliance obligations, and ongoing sustainability challenges.

Participants will develop a clear understanding of retirement scheme management within governance frameworks and social security governance environments. The course emphasizes how fiduciary responsibility in schemes is applied in real decision-making, how pension regulatory frameworks shape operational management, and how pension compliance and oversight are maintained throughout the scheme lifecycle.

Rather than focusing on theoretical design models, the program links retirement scheme design and pension system design concepts only where they support effective management, performance monitoring. Through applied discussions and management scenarios, participants will gain the skills needed to support retirement scheme sustainability, and ensure that pension fund design continues to meet organizational and member expectations.

Target Audience:

- Retirement scheme managers and administrators
- Governance and compliance officers
- Risk management professionals
- Senior HR and finance managers responsible for retirement planning systems

Targeted Organizational Departments:

- Retirement and benefits administration
- Risk management and internal control
- Governance, policy, and compliance units
- Finance and treasury departments

Targeted Industries:

- Financial services and asset management
- Insurance and long-term savings institutions
- Large organizations managing occupational retirement schemes
- Regulatory and supervisory environments

Course Offerings:

By the end of this course, participants will be able to:

- Manage retirement schemes in line with established pension governance frameworks
- Apply fiduciary responsibility principles in pension scheme management decisions
- Monitor and manage pension risk frameworks affecting scheme performance
- Ensure compliance with pension regulatory frameworks and oversight requirements
- Oversee operational, financial, and demographic risks within retirement schemes
- Support long-term pension sustainability and retirement scheme sustainability

Training Methodology:

This course uses a management-oriented learning approach combining expert-led instruction, operational case discussions, group exercises, and scenario-based analysis. Participants will examine real-life challenges related to social security governance, pension compliance and oversight, and pension risk management. Interactive sessions focus on applying governance and fiduciary responsibility concepts to day-to-day retirement scheme management, while reflection sessions reinforce learning through practical interpretation of management decisions and outcomes.

Course Toolbox:

- Retirement scheme management frameworks and models
- Governance and fiduciary responsibility checklists illustrative
- Compliance and oversight workflow examples
- Case-based management scenarios

Note: The course provides insights and examples of management tools rather than physical or licensed tools.
