Organization Development and Total Rewards Integration Course

Ref: 1623_219861 **Date:** 25 – 29 July 2027 **Location:** Geneva **Fees:** 6200 Euro

Overview

Organization Development and Total Rewards Integration Course is a one-week advanced course for HR leaders, organization development practitioners, reward leaders, and workforce transformation teams who leave with an OD–Rewards Integration Portfolio. Participants use organization development diagnosis to align a total rewards integration, employee value proposition, reward system governance, behavior, and change adoption. Agile Leaders Training Center presents organization development and total rewards as one evidence-led change discipline.

Who Should Attend

- Functions responsible for organization development diagnosis and intervention
- Teams responsible for compensation, benefits, recognition, and well-being
- Leaders responsible for workforce strategy and employee value
- Functions responsible for culture, engagement, and change adoption
- Teams responsible for reward governance and people analytics

The course assumes participants shape HR strategy, reward decisions, or organizational change and leaves payroll processing, salary administration, and detailed job evaluation outside scope.

Departments and Industries

The course supports departments and industries aligning workforce interventions with the employment offer.

- Human resources and organization effectiveness functions
- Compensation, benefits, and people analytics teams
- Financial services and professional-services organizations
- Healthcare and technology organizations
- Manufacturing, infrastructure, and energy operations

Learning Objectives

By the end of this course, participants will be able to:

- Diagnose organizational and workforce conditions affecting rewards
- Analyze employee evidence and reward-system gaps
- Build an integrated total rewards architecture
- Apply governance, equity, and behavioral design controls
- Prioritize implementation and change-adoption actions
- Evaluate workforce experience and organizational outcomes

Course Agenda

Day 1: OD Diagnosis and Reward Context

- Open-System Organization Diagnosis Map
- Stakeholder and Workforce Evidence Plan
- Reward Inventory and Maturity Assessment
- Business and People Strategy Alignment Grid
- Current-State OD-Rewards Gap Analysis

Day 2: People Value and Reward Architecture

- Employee Value Proposition Canvas
- Total Rewards Portfolio Architecture
- Compensation and Benefits Design Logic
- Well-Being, Careers, and Recognition Map
- Workforce Segment Value Matrix

Day 3: Behavior, Culture, and Governance

- Behavioral Consequence Mapping Method
- Culture and Reward Congruence Test
- Equity and Consistency Review Checklist
- Reward Decision Rights Matrix
- Risk, Exception, and Escalation Register

Day 4: Intervention and Change Adoption

- OD Intervention Selection Matrix
- Reward Transition Impact Assessment
- Manager Enablement and Dialogue Toolkit
- Employee Communication Journey Map
- Implementation Wave and Dependency Roadmap

Day 5: Integration Practice and Evaluation

- Exercise: OD Diagnosis Evidence Review
- Exercise: Total Rewards Portfolio Decision
- Exercise: Governance and Behavior Stress Test
- Exercise: Adoption and Measurement Review
- Capstone Exercise: OD–Rewards Integration Portfolio

Practical Exercises

The course uses suggested activities to turn organizational evidence into integrated reward and change decisions.

- Suggested activity: diagnose reward-related retention and engagement signals in a healthcare or technology case.
- Suggested activity: design a segmented total rewards portfolio and test its cultural consequences.
- Suggested activity: assign decision rights, exceptions, and controls for a reward transition.
- Suggested activity: present the OD–Rewards Integration Portfolio and measurement logic.

FAQs

Who suits organization development and total rewards integration training?

HR, OD, total rewards, people analytics, culture, and transformation teams suit the training when they already influence workforce or reward decisions.

How does total rewards integration differ from compensation management training?

Total rewards integration connects compensation with benefits, well-being, careers, recognition, employee value, culture, and change; compensation management training concentrates more narrowly on pay structures and administration.

How does organization development improve a total rewards strategy?

Organization development adds diagnosis, stakeholder participation, behavioral analysis, intervention design, adoption planning, and evaluation so reward choices respond to organizational conditions rather than market data alone.

What evidence supports an employee value proposition?

An employee value proposition uses workforce segments, employee listening, turnover and engagement patterns, labor-market evidence, cost constraints, career needs, and organizational purpose.

How should total rewards outcomes be evaluated?

Total rewards outcomes should combine employee experience, attraction, retention, capability, performance, equity, utilization, cost, and adoption measures with explicit baselines and review decisions.

Conclusion

Participants take back an OD-Rewards Integration Portfolio containing diagnosis, architecture, governance, intervention, adoption, and measurement artifacts. The portfolio changes disconnected reward initiatives into an evidence-led organizational intervention. It helps teams align the employment offer with strategy, culture, workforce needs, and accountable implementation.
