Advanced Agile Coaching Training Course: Elevating Your Coaching Skills (Advanced)

Ref: 1016_224180 **Date:** 21 – 25 June 2027 **Location:** Addis Ababa **Fees:** 4500 Euro

Course Overview:

The Agile Coaching Course Advanced is a comprehensive and immersive training program designed to equip participants with the skills and knowledge needed to excel as agile coaches in today's dynamic business environment. This course delves into advanced concepts and techniques that empower participants to effectively guide teams and organizations towards agile excellence. Through interactive sessions, case studies, and real-world examples, participants will gain a deep understanding of agile principles, communication strategies, and leadership coaching. They will learn how to navigate the challenges of agile implementation, address identity crises within teams, and foster a culture of continuous improvement. This course also covers agile certification and explores various agile project management approaches. By the end of this course, participants will have the tools and confidence to take their agile coaching skills to the next level.

Target Audience:

- Agile Coaches seeking to enhance their coaching and mentoring skills
- Project Managers and Scrum Masters transitioning to agile coaching roles
- Leaders and Managers responsible for agile transformation initiatives
- Professionals involved in agile project management and delivery

This course is designed to address specific skills gaps in agile coaching, including communication strategy, leadership coaching, and navigating agile identity crises. It is suitable for individuals at various stages of their careers, from beginner to experienced practitioners, who are eager to elevate their agile coaching capabilities.

Targeted Organizational Departments:

- Agile Transformation Teams
- Human Resources and Learning & Development
- Project Management Offices PMOs

Targeted Industries:

The Agile Coaching Course Advanced is beneficial for professionals across a wide range of industries that are embracing agile methodologies. Industries that would particularly gain from this course include IT and Software Development, Product Development, Financial Services, Healthcare, Manufacturing, Telecommunications, Retail, Consulting, and Government sectors.
