How This Course is Different from Other Project Training Courses:

Our course uniquely merges the worlds of project management and cost control engineering. Unlike other training courses, we introduce Agile project management principles to conventional project management. This course is enriched with real-life case studies, role plays and interactive sessions, enabling you to better understand the day-to-day roles of project managers, Agile project managers, and cost control engineers. We also provide a comprehensive guide on how to get a certification course, empowering you to take your career to the next level.
