CSCP Exam Prep for Professional Supply Chain Leaders

Ref: 103600566_225371 **Date:** 8 – 12 February 2027 **Location:** Addis Ababa **Fees:** 4500 Euro

Course Overview:

The CSCP Exam Prep Masterclass for Supply Chain Professionals is a comprehensive 1-week corporate training program designed to prepare participants for the globally recognized APICS CSCP Certification while strengthening practical expertise in end-to-end supply chain management, logistics operations, sourcing strategies, inventory optimization, forecasting, and global supply chain leadership. The course combines exam preparation with real-world business applications to help professionals develop the operational and strategic capabilities required in today's highly interconnected supply chain environments.

Built around the APICS CSCP Exam Content Manual and internationally recognized supply chain management frameworks, this program covers Supply Chain Operations Training, Procurement and Supply Chain Training, Demand Planning and Forecasting, Strategic Sourcing Training, Logistics Management Certification concepts, and Advanced Supply Chain Management methodologies.

Participants will gain practical insights into Global Supply Chain Management, Supply Chain Planning Course methodologies, inventory control systems, logistics optimization, supplier collaboration, supply chain risk mitigation, and sustainability-driven operations. The course also includes CSCP-style assessments, case studies, interactive workshops, and exam-focused reviews designed to improve both certification readiness and workplace performance.

This CSCP Instructor-Led Training is ideal for professionals seeking internationally recognized Supply Chain Professional Certification while enhancing operational excellence, strategic decision-making, and supply chain leadership capabilities.

Target Audience:

- Supply Chain Managers
- Procurement Managers
- Logistics Managers
- Operations Managers
- Inventory Control Specialists
- Demand Planning Analysts
- Warehouse Managers
- Distribution Managers
- Manufacturing Professionals
- Strategic Sourcing Specialists
- Supply Chain Coordinators

AGILE LEADERS
Training Center

Targeted Organizational Departments:

- Supply Chain Management
- Procurement & Strategic Sourcing
- Logistics & Transportation
- Operations Management
- Warehouse & Distribution
- Inventory Management
- Production Planning
- Demand Planning & Forecasting
- Manufacturing Operations

Targeted Industries:

- Manufacturing
- Retail & E-Commerce
- Aviation & Aerospace
- Logistics & Transportation
- Maritime & Shipping
- Government & Public Sector
- Energy & Utilities
- Construction & Infrastructure
- Technology & Electronics

Course Offerings:

By the end of this course, participants will be able to:

- Understand APICS CSCP Certification concepts and exam domains
- Apply End-to-End Supply Chain Management principles
- Analyze global supply chain networks and operational workflows
- Implement effective Demand Planning and Forecasting techniques
- Optimize inventory management and warehouse operations
- Strengthen procurement processes using Strategic Sourcing Training methods
- Evaluate logistics and transportation strategies
- Apply Supply Chain Operations Training best practices
- Improve supplier collaboration and sourcing performance
- Apply sustainability principles within supply chain operations
- Prepare effectively for the Supply Chain Professional Certification examination

Training Methodology:

This CSCP Bootcamp uses an interactive and application-focused methodology designed to maximize both certification readiness and practical implementation skills. Participants will engage in instructor-led workshops, collaborative discussions, forecasting exercises, inventory simulations, sourcing case studies, logistics optimization activities, and CSCP-style exam reviews.

The training methodology incorporates:

- Interactive presentations
- Group discussions
- Real-world case studies
- Supply chain simulations
- Logistics planning workshops
- Forecasting and inventory exercises
- Mock exam practice sessions
- Risk management analysis
- KPI and performance evaluation workshops
- Reflection and review sessions

Participants will also work through practical exercises based on Global Supply Chain Management challenges, helping them strengthen operational decision-making, supply chain optimization, and strategic planning capabilities aligned with APICS CSCP standards.

Course Toolbox:

- Supply Chain Planning Templates
- Forecasting Worksheets
- Inventory Optimization Exercises
- Strategic Sourcing Frameworks
- Supply Chain KPI Dashboards
- Risk Assessment Templates
- Logistics Cost Analysis Models
- Transportation Planning Models
- Sustainability Assessment Examples

Note: Tools are not physically provided. The course focuses on practical insights only.

Course Agenda:

Day 1: Supply Chain Foundations & Demand Management

- **Topic 1:** Introduction to APICS CSCP Certification and Supply Chain Professional Certification
- **Topic 2:** Fundamentals of End-to-End Supply Chain Management
- **Topic 3:** Global Supply Chain Management Concepts and Network Structures
- **Topic 4:** Demand Planning and Forecasting Techniques
- **Topic 5:** Supply Chain Operations Training and Process Integration
- **Topic 6:** Supply Chain Strategy Training and Customer-Centric Operations
- **Reflection & Review:** Reviewing core supply chain foundations, forecasting principles, and operational integration concepts

Day 2: Procurement, Sourcing & Supply Chain Planning

- **Topic 1:** Procurement and Supply Chain Training Fundamentals
- **Topic 2:** Strategic Sourcing Training and Supplier Selection
- **Topic 3:** Category Management and Supplier Relationship Management
- **Topic 4:** Supply Chain Planning Course Methodologies
- **Topic 5:** International Sourcing and Global Procurement Challenges
- **Topic 6:** Contract Management and Procurement Risk Mitigation
- **Reflection & Review:** Reviewing sourcing strategies, procurement optimization, and supply planning frameworks

Day 3: Inventory, Operations & Logistics Management

- **Topic 1:** Inventory Management Training and Inventory Control Systems
- **Topic 2:** Warehouse Operations and Distribution Management
- **Topic 3:** Capacity Planning and Production Activity Control
- **Topic 4:** Logistics and Supply Chain Course Applications in Transportation
- **Topic 5:** Lean Operations and Continuous Improvement
- **Topic 6:** Supply Chain Performance Metrics and KPI Analysis
- **Reflection & Review:** Reviewing logistics operations, inventory optimization, and operational performance improvement

Training Center

Day 4: Supply Chain Relationships, Risk & Sustainability

- **Topic 1:** Customer and Supplier Relationship Management
- **Topic 2:** Supply Chain Collaboration and End-to-End Visibility
- **Topic 3:** Supply Chain Risk Identification and Risk Analysis
- **Topic 4:** Business Continuity and Supply Chain Resilience Strategies
- **Topic 5:** Sustainability and Green Supply Chain Practices
- **Topic 6:** Technology Trends in Advanced Supply Chain Management
- **Reflection & Review:** Reviewing risk management strategies, sustainability initiatives, and collaborative supply chain practices

Day 5: Optimization, Leadership & CSCP Exam Readiness

- **Topic 1:** Supply Chain Optimization and Process Improvement
- **Topic 2:** Supply Chain Leadership Course and Strategic Decision-Making
- **Topic 3:** Advanced Global Logistics and Transportation Strategies
- **Topic 4:** Digital Transformation and Supply Chain Analytics
- **Topic 5:** CSCP Mock Exam Practice and Exam-Taking Strategies
- **Topic 6:** Final APICS CSCP Certification Review Workshop
- **Reflection & Review:** Comprehensive review of CSCP domains, exam readiness, and advanced supply chain leadership practices

FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

There are no mandatory prerequisites for attending this course. However, professionals working in supply chain management, procurement, logistics, operations, inventory management, or planning functions will benefit the most from this training. The course is ideal for participants preparing for APICS CSCP Certification or seeking advanced Supply Chain Skills Development.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4–5 hours, with breaks and interactive activities included. The total course duration spans one week, approximately 20–25 hours of instruction.

AGILE LEADERS
Training Center

Does this course focus only on passing the exam or also on practical implementation?

This course combines CSCP exam preparation with practical implementation strategies. Participants will not only prepare for the APICS CSCP Certification examination but will also strengthen operational capabilities in sourcing, logistics, inventory management, forecasting, supply chain planning, and strategic supply chain leadership.

How This Course is Different from Other CSCP Exam Prep Courses:

The CSCP Exam Prep Masterclass for Supply Chain Professionals stands apart from traditional Supply Chain Certification Course programs by combining exam preparation with real-world operational transformation strategies. Rather than focusing only on memorization, this program integrates Global Supply Chain Management applications, advanced logistics frameworks, demand forecasting exercises, strategic sourcing workshops, and operational optimization simulations aligned with modern supply chain realities.

Unlike many generic CSCP Bootcamp programs, this course incorporates practical scenarios covering procurement, sourcing, inventory, transportation, risk management, sustainability, and digital supply chain transformation. Participants gain exposure to both the theoretical APICS CSCP Certification framework and the operational realities faced by multinational organizations.
