Luxury Resort, Spa and Wellness Operations Course

Ref: 2129_255928 **Date:** 29 November – 3 December 2026 **Location:** Nairobi **Fees:** 4500 Euro

Overview

Luxury Resort, Spa and Wellness Operations Course is a one-week foundation course for resort, spa, guest-experience, housekeeping, facilities, food and beverage, and quality functions, and participants leave with a Resort, Spa and Wellness Operations Improvement Plan. The course connects luxury resort operations, wellness spa operations, guest journeys, spa capacity and scheduling, treatment-room readiness, cross-department handoffs, service recovery, and performance controls. Agile Leaders Training Center presents integrated resort, spa, and wellness operations.

Who Should Attend

- Resort operations functions responsible for coordinated guest services and operating readiness
- Spa and wellness functions responsible for capacity, scheduling, treatments, hygiene, and inventory
- Guest-experience functions responsible for journeys, privacy, personalization, and service recovery
- Housekeeping and engineering functions responsible for room, facility, and equipment readiness
- Food and beverage functions responsible for wellness-aligned service coordination
- Hospitality quality functions responsible for inspections, evidence, and improvement

The course assumes participants coordinate hospitality operations and leaves clinical wellness practice, front-office specialization, event production, and rating preparation outside its scope.

Departments and Industries

The course supports departments and industries that coordinate resort services, wellness facilities, and guest operations.

- Luxury resorts, destination spas, and wellness retreats
- Resort operations and guest-experience departments
- Spa, fitness, recreation, and wellness services
- Housekeeping, engineering, and facilities functions
- Food and beverage and hospitality quality teams

Learning Objectives

By the end of this course, participants will be able to:

- Analyze resort guest journeys and service standards.
- Apply wellness spa service and readiness controls.
- Build spa capacity, scheduling, staffing, and inventory plans.
- Diagnose cross-department handoff and service-recovery failures.
- Use privacy, safety, quality, and sustainability checklists.
- Evaluate performance evidence and prioritize operational improvements.

Course Agenda

Day 1: Map Resort and Wellness Operations

- Luxury Resort Operating Model Canvas
- Resort Guest Journey and Touchpoint Map
- Service Standard and Guest Preference Matrix
- Resort Department Responsibility Map
- Current-State Operations Readiness Assessment

Day 2: Control Spa Services and Capacity

- ISO 17679:2016 Wellness Spa Scope Checklist
- Spa Capacity, Demand, and Appointment Grid
- Treatment-Room Turnaround and Readiness Checklist
- Therapist Staffing and Skills Coverage Matrix
- Spa Product and Linen Inventory Control Sheet

Day 3: Coordinate Facilities and Guest Services

- Housekeeping-to-Engineering Handoff Board
- Guest Request and Work-Order Control Log
- Food and Beverage Wellness Service Matrix
- Privacy, Safety, and Hygiene Control Checklist
- Facility Inspection and Preventive Action Record

Day 4: Assure Service and Performance

- Service Recovery Decision and Escalation Map
- Cross-Department Daily Operations Brief
- Guest Feedback and Quality Evidence Register
- Resort Sustainability Action Checklist
- Resort, Spa, and Wellness Performance Scorecard

Day 5: Practice Integrated Operations Improvement

- Suggested Exercise: Analyze a Resort Guest Journey
- Suggested Exercise: Balance Spa Capacity and Staffing
- Suggested Exercise: Resolve a Facility Readiness Handoff
- Suggested Exercise: Review Service and Performance Evidence
- Capstone Exercise: Complete a Resort, Spa and Wellness Operations Improvement Plan

Practical Exercises

The course uses suggested activities based on destination-resort, wellness-retreat, and mixed-use hospitality cases.

- Suggested activity: map a guest journey across reservations, arrival, accommodation, spa, recreation, dining, and departure touchpoints.
- Suggested activity: balance appointment demand, treatment rooms, therapist skills, turnaround requirements, linens, and product inventory.
- Suggested activity: diagnose a housekeeping, engineering, spa, and guest-service handoff using requests, work orders, inspections, and escalation evidence.
- Suggested activity: combine quality, privacy, safety, sustainability, recovery, and performance actions in an operations improvement plan.

FAQs

Who suits Luxury Resort, Spa and Wellness Operations, and what does it assume?

Luxury Resort, Spa and Wellness Operations suits resort, spa, guest-experience, housekeeping, engineering, food and beverage, and quality functions. It assumes participants coordinate hospitality services without requiring clinical wellness credentials.

How does Luxury Resort Operations differ from general luxury hospitality service training?

Luxury Resort Operations focuses on capacity, readiness, facilities, staffing, inventory, handoffs, recovery, and performance controls. General luxury hospitality service training commonly focuses on guest attitude, communication, recognition, and personalization.

How does spa capacity planning support wellness resort operations?

Spa capacity planning aligns appointment demand, treatment rooms, therapist skills, turnaround time, linens, products, and facility availability so teams can identify constraints and protect service flow.

AGILE LEADERS
Training Center

What operational controls support a resort wellness guest journey?

Operational controls connect guest preferences, reservations, rooms, facilities, spa services, recreation, dining, requests, recovery, and quality evidence across the guest journey.

Conclusion

Participants take back a Resort, Spa and Wellness Operations Improvement Plan. It combines guest-journey findings, service standards, capacity decisions, facility controls, department handoffs, recovery actions, sustainability priorities, and performance measures. The plan changes disconnected resort activities into a coordinated operating effort linked to guest needs and service readiness.
