The Corporate Financial Planning and Analysis Training Course

Ref: 1005_262494 **Date:** 23 – 27 November 2026 **Location:** London **Fees:** 5700 Euro

Overview:

The Financial Planning And Analysis Course is a comprehensive training program designed to equip participants with the essential skills and knowledge required for effective financial planning and analysis. This course covers a wide range of topics, including budgeted balance sheet, net cash flow calculation, types of expenditure, working capital needs, financial statement modeling in Excel, and more. Participants will learn how to analyze and control financial performance, interpret major financial statements, understand the cash flow statement using both direct and indirect methods, and prepare a master budget. The course provides practical insights and real-world examples to enhance learning and application. By the end of this course, participants will have the expertise to excel in financial planning and analysis roles.

Target Audience:

- Financial Analysts
- Budgeting and Forecasting Professionals
- Financial Managers
- Accounting Professionals
- Business Analysts

This course is designed for individuals who want to enhance their financial planning and analysis skills or pursue a career in this field. It addresses the skills gaps in financial statement modeling, budget preparation, cost analysis, and cash flow management. Additionally, it provides a solid foundation for business analysts and data analysts looking to gain a deeper understanding of financial analysis and planning.

Targeted Organizational Departments:

- Finance Department
- Accounting Department
- Budgeting and Forecasting Department
- Strategic Planning Department

This course is particularly beneficial for departments involved in financial planning and analysis within organizations. It provides employees with the necessary skills to analyze and control financial performance, make informed decisions, and contribute to the overall financial health of the organization. Moreover, it offers valuable insights to business analysts and data analysts, enabling them to effectively analyze financial data and provide strategic recommendations.

How This Course is Different from Other Financial Planning and Analysis Training Courses:

The Financial Planning And Analysis Course stands out from other similar courses due to its comprehensive coverage of financial planning and analysis topics, practical hands-on exercises in financial statement modeling using Excel, and its focus on real-world application. Unlike traditional courses, this training program goes beyond theoretical concepts by providing participants with the necessary tools, templates, and resources to excel in financial planning and analysis roles. Additionally, it offers valuable insights to business analysts and data analysts, enabling them to effectively analyze financial data and provide strategic recommendations. By incorporating interactive learning methods, practical case studies, and collaborative exercises, this course ensures that participants gain the skills and knowledge required to excel in financial planning and analysis.
