Amman

Accounting Management For Decision-Making Training Course (5 Days)

Ref: 36371_27582 **Date:** 11 – 15 July 2027 **Location:** Amman **Fees:** 4100 Euro

Course Overview:

This training course is designed to equip professionals with the skills and knowledge necessary to excel in accounting management. This course delves into critical accounting aspects essential for strategic decision-making, including Budgeting Systems, Cost Allocation Theory, and Absorption Cost Systems. Participants will gain a deep understanding of Generic Budgeting Systems, Decision Management and Control, and New Budgeting Approaches, which are pivotal in enhancing organizational budgeting practices. Furthermore, the course covers advanced topics such as Job Order Costing, Overhead Allocation, Process Costing, and Activity-Based Costing ABC, ensuring a complete grasp of modern accounting practices. With a focus on practical applications and current industry trends, this training program prepares participants to tackle complex accounting challenges, implement effective management accounting innovations like Total Quality Management TQM and Just-in-Time JIT Production, and leverage competitive forces in accounting. By integrating concepts such as Lean Production, and the Balanced Scorecard, and addressing accounting for environmental changes, this course provides a holistic approach to accounting management. This course is an indispensable resource for professionals aiming to make informed and impactful organisational decisions.

Target Audience:

- Chief Financial Officers CFOs
- Accounting Managers
- Financial Controllers
- Senior Accountants
- Financial Analysts
- Budget Analysts

Targeted Organizational Departments:

- Finance and Accounting
- Budgeting and Planning
- Internal Audit
- Financial Reporting
- Cost Management

Targeted Industries:

- Manufacturing
- Healthcare
- Education
- Public Sector
- Private Corporations

Course Offerings:

By the end of this course, participants will be able to:

- Develop and implement effective budgeting systems, including generic and participative budgeting.
- Manage the trade-off between decision management and decision control.
- Apply cost allocation theory and practices in various organizational contexts.
- Utilize absorption cost systems, job order costing, and process costing for accurate financial reporting.
- Implement activity-based costing ABC and standard costing to enhance decision-making.
- Analyse and manage overhead, marketing variances, and direct labour/materials variances.
- Integrate management accounting innovations like TQM, JIT Production, Six Sigma, and Lean Production into their accounting practices.
- Adapt to environmental changes and leverage competitive forces in accounting.

Training Methodology:

The course employs a diverse range of training methodologies to ensure a complete learning experience. Participants will engage in case studies that provide real-world applications of budgeting systems, cost allocation, and advanced accounting practices. Group work will foster collaborative learning and allow participants to tackle complex accounting scenarios together. Interactive sessions will include discussions on decision management and control, as well as new budgeting approaches, encouraging active participation and knowledge sharing. Feedback sessions will be conducted to provide personalized guidance and insights into each participant's progress.

Course Toolbox:

- complete workbooks
- Reading materials on advanced accounting practices
- Online resources and case studies
- Checklists and templates for budgeting and cost allocation

How This Course is Different from Other Accounting Management Courses:

The course stands out by providing a unique blend of accounting techniques and practical applications tailored to today's dynamic business environment. Unlike other courses, it integrates a complete overview of budgeting systems, cost allocation theories, and absorption cost systems with modern management accounting innovations like TQM, JIT Production, and Six Sigma. This course emphasizes real-world applications through interactive sessions, case studies, and hands-on exercises, ensuring participants can implement what they learn directly in their organizations. Additionally, it addresses the challenges posed by competitive forces and environmental changes, preparing professionals to adapt and thrive in evolving industry landscapes. By focusing on strategic decision-making and providing a holistic approach to accounting management, this course ensures participants are well-equipped to drive organizational success.
