The Agile Job Evaluation Certification Training Course

Ref: 1009_682 **Date:** 5 – 9 April 2027 **Location:** Paris **Fees:** 5700 Euro

Overview

Fast-evolving operating environments demand responsive role classification, transparent grading architectures, and equitable compensation models. The Agile Job Evaluation Certification Training Course equips HR professionals and compensation managers with structured methodologies to analyze, evaluate, and level roles across flexible organizational models. Participants learn how to apply both qualitative and quantitative job evaluation methods, distinguish functional job descriptions from evaluation benchmarks, and implement analytical point-factor systems. The syllabus examines Hay job evaluation principles, job hazard analysis in agile teams, total rewards alignment, and succession planning utilizing talent replacement charts. This course is delivered by Agile Leaders Training Center.

Who Should Attend

- HR specialists responsible for compensation structures, salary bands, and role grading.
- HR business partners responsible for advising departmental leaders on talent alignment and role design.
- Human resource managers responsible for organizational design, succession planning, and workforce governance.
- Talent management leads responsible for career pathways and internal mobility frameworks.
- People operations professionals responsible for job analysis and performance evaluation consistency.

Departments and Industries

This course serves human resources, total rewards, and organizational design teams across rapidly shifting corporate environments.

- Human Resources and Total Rewards Departments in Technology and Software Development
- People Operations Teams in Management and Strategy Consultancies
- Workforce Planning Units in Financial Services and Banking
- Organizational Design Groups in Healthcare and Pharmaceuticals
- Talent Strategy Teams in Large Enterprises Undergoing Digital Transformation

Learning Objectives

By the end of this course, participants will be able to:

- Apply agile principles to modern job analysis and role evaluation frameworks.
- Differentiate clearly between functional job descriptions and systematic job evaluation.
- Implement qualitative and factor-based evaluation models across evolving job families.
- Utilize Hay job evaluation techniques to establish fair and consistent internal role hierarchies.
- Conduct job hazard analysis to identify and mitigate operational risks within dynamic roles.
- Build talent replacement charts to strengthen succession planning and workforce resilience.
- Design total rewards strategies that link pay grades, benefits, and recognition to business goals.

Course Agenda

Day 1: Agile Principles in Human Resources

- Agile Methodology Foundations and Iterative Workflow Models
- Transitioning Traditional HR Functions to Agile Frameworks
- Role Expectations and Accountabilities for the Agile HR Practitioner
- Implementing Feedback Loops in Talent Assessment Workflows
- Aligning People Operations with Organizational Agility Goals

Day 2: Job Evaluation Principles and Role Analysis

- Core Job Evaluation Definition and Structural Methodologies
- Differentiating Job Descriptions from Job Evaluation Systems
- Qualitative Methods of Job Evaluation across Dynamic Teams
- Establishing Equitable Role Grading and Internal Alignment Criteria
- Agile Job Analysis Techniques for Evolving Responsibilities

Day 3: Analytical Job Evaluation and Operational Risk Analysis

- Factor Comparison and Point-Factor Job Evaluation Frameworks
- Hay Job Evaluation Training and Guide Chart Application
- Job Hazard Analysis Training within Agile Operational Environments
- Risk Mitigation and Role Vulnerability Auditing in Work Design
- Evaluating Technical and Cross-Functional Job Demands

Day 4: Organizational Design and Succession Architecture

- Agile Organizational Design Principles and Team Typologies
- Succession Planning Training using Practical Replacement Charts
- Capability Mapping and Talent Pipeline Sizing Models
- Total Rewards Integration: Compensation and Benefit Structures
- Salary Grade Modeling and Pay-for-Performance Systems

Day 5: Compensation Governance and HR Business Partnering

- Benefits Administration, Recognition Programs, and Retention Metrics
- Strategic Workforce Planning within Agile Human Resource Management
- The Strategic Advisory Role of the Agile HR Business Partner
- Preparing Documentation for Agile HR Certification Standards
- Capstone Role Evaluation and Compensation Structuring Workshop

Practical Exercises

Participants engage in structured case applications and role evaluation simulations.

- Suggested activity: Conduct a point-factor job evaluation for a multi-disciplinary agile team role.
- Suggested activity: Construct an agile succession matrix utilizing talent replacement charts.
- Suggested activity: Formulate a job hazard analysis checklist for cross-functional project teams.
- Suggested activity: Design a total rewards scorecard integrating base pay and performance recognition.

FAQs

How does this course address traditional versus agile job evaluation?

The program contrasts conventional static grading systems with flexible, qualitative, and point-factor evaluation methodologies suitable for fluid team structures.

What evaluation models are explored during the sessions?

Participants analyze point-factor frameworks, qualitative ranking methods, and Hay job evaluation techniques tailored to evolving responsibilities.

Who benefits most from this agile evaluation training?

HR business partners, compensation specialists, and talent managers seeking to modernize grading structures and align succession planning with rapid organizational change.

Conclusion

Organizations require responsive role architectures to maintain equity, motivate talent, and respond swiftly to business transformation. By completing this program, HR professionals acquire the analytical tools to conduct objective job evaluations, build robust succession pipelines, and align total rewards strategies with organizational goals.
