# Risk Management and Internal Audit: A Structured Approach Training Course

**Ref:** 36316_76058 **Date:** 26 July – 6 August 2027 **Location:** Abu Dhabi **Fees:** 8000 Euro

## Course Overview:

The course is meticulously designed to elevate the capabilities of internal auditors in aligning their practices with the organization's strategic goals through a risk-based approach. This complete training delves into essential topics such as internal audit methodology, governance and risk management training, and effective internal audit techniques. Participants will gain insights into internal audit best practices, corporate governance audits, and advanced risk assessment techniques in auditing. The course emphasizes strategic risk management in auditing, internal audit planning and execution, and the COSO framework for risk management. By mastering risk tolerance in auditing and understanding internal audit roles and responsibilities, attendees will be well-equipped to differentiate between internal and external audits, understand audit committee functions, and conduct enterprise risk management ERM audits.

## Target Audience:

- Internal auditors
- Financial auditors and compliance officers
- Corporate governance professionals
- Risk management officers and strategic planners
- Members of audit committees
- Professionals involved in enterprise risk management ERM audits and contract auditing strategies.

## Targeted Organizational Departments:

- Internal Audit Departments
- Risk Management Departments
- Compliance and Regulatory Affairs
- Financial Audit and Control Departments
- Corporate Governance Teams
- Strategic Planning and Performance Management

## Targeted Industries:

- Financial Services and Banking
- Healthcare and Pharmaceuticals
- Manufacturing and Industrial Sectors
- Technology and Telecommunications
- Energy and Utilities
- Government and Public Sector

## Course Offerings:

By the end of this course, participants will be able to:

- Define the scope and functions of internal audit in the company.
- Distinguish between various types of internal audit tasks related to operations, compliance, quality, safety, and finance.
- Describe guidelines for planning internal audits and develop a risk-based audit plan.
- Apply risk identification and control testing techniques.
- Determine the best sampling methods for internal audit tasks.
- Select appropriate testing tools for internal audits and evaluate their advantages and disadvantages.

## Training Methodology:

This course employs interactive training methodologies, including presentations, case studies, and illustrative model methodologies. Participants will engage in group exercises to apply the knowledge gained, fostering an immersive learning experience. Techniques such as role-playing, scenario analysis, and feedback sessions will be utilized to reinforce learning.

## Course Toolbox:

- complete workbooks and manuals
- Online resources for learning and development
- Checklists and templates for audit planning and execution

- **Topic 2:** Best Practices in Audit Interview Techniques
- **Topic 3:** Documenting Internal Audit Processes
- **Topic 4:** Utilizing Administrative Controls in Audits
- **Topic 5:** Advanced Sampling Methods for Audits
- **Topic 6:** Final Review of Audit Techniques and Strategies
- **Reflection & Review:** Comprehensive Course Review and Feedback

## How This Course is Different from Other Training Courses:

This course in Risk-Based Internal Audit distinguishes itself by offering a complete and practical approach to internal auditing. It covers the entire spectrum of internal audit processes, from planning to execution, with a strong emphasis on risk management. Unlike other courses, this program integrates the latest methodologies and tools, such as the COSO framework for risk management, and provides hands-on experience through interactive sessions and real-world case studies. Participants will benefit from a robust curriculum that not only addresses traditional audit practices but also delves into advanced topics like strategic risk management, internal control testing, and specialized audits.
