IIA 2024 Internal Audit & ERM Excellence Training

Ref: 103600552_77808 **Date:** 12 – 16 July 2027 **Location:** Dubai **Fees:** 4500 Euro

Course Overview:

This internal audit training course is designed to equip professionals with a comprehensive understanding of the internal audit standards 2024 and the evolving expectations of modern audit functions. Built around the IIA 2024 internal audit standards and aligned with global internal audit standards, this program provides a structured pathway for developing high-impact audit capabilities in both public and private sectors.

Participants will explore internal auditing professional standards, practical audit methodologies, and internal audit best practices 2024, while gaining hands-on exposure to IIA audit framework training and enterprise risk management ERM integration. This corporate internal audit training program is ideal for professionals seeking internal audit certification preparation and those aiming to enhance governance, risk, and compliance performance.

The course combines theory with application, enabling participants to design, execute, and improve audit functions using internationally recognized frameworks. Whether attending as part of a professional internal auditor training journey or an advanced internal auditing course, learners will leave with actionable insights to strengthen audit effectiveness and organizational value.

Target Audience:

- Internal Auditors Junior to Senior Level
- Audit Managers & Heads of Internal Audit
- Risk & Compliance Officers
- Government Audit Professionals
- Finance Controllers & Accountants
- Corporate Governance Specialists
- Professionals preparing for internal audit certification

Training Methodology:

This internal audit workshop and seminar adopts a highly interactive and practical learning approach designed for maximum engagement and retention. Participants will engage in real-world case studies reflecting internal audit standards 2024 applications across industries. Group discussions and collaborative exercises will simulate audit planning, execution, and reporting aligned with global internal audit standards.

The course integrates scenario-based learning, allowing participants to apply internal auditing professional standards in realistic environments. Practical workshops will focus on building audit programs, risk assessments, and control evaluations, supporting internal audit certification preparation.

Interactive sessions include role-playing exercises where participants perform audit interviews and present findings, reinforcing internal audit best practices 2024. Continuous feedback sessions ensure knowledge gaps are addressed effectively.

This blended approach ensures participants in both classroom and internal audit training course online formats receive hands-on experience, making this advanced internal auditing course both practical and impactful.

Course Toolbox:

- Internal audit framework templates based on IIA standards
- Risk-based audit planning tools and ERM models
- Audit working papers and documentation samples
- Internal control evaluation checklists
- Audit reporting templates aligned with professional standards
- Case study packs based on real audit scenarios
- Governance and compliance assessment frameworks

Note: Tools are not physically provided; participants will gain insights, frameworks, and practical examples relevant to real-world application.

How does ERM integrate with internal audit under the IIA 2024 framework?

ERM provides the foundation for risk-based auditing. Under internal audit standards 2024, auditors must align audit plans with organizational risks, ensuring audits focus on high-impact areas and support strategic decision-making.

How This Course is Different from Other Professional Internal Audit Training Courses:

This corporate internal audit training program stands out by combining IIA 2024 internal audit standards with practical ERM integration, ensuring participants move beyond theory into real-world application. Unlike generic programs, this course emphasizes internal audit best practices 2024 through hands-on case studies, audit simulations, and structured frameworks aligned with global internal audit standards.

Participants benefit from a strong focus on internal audit certification training, making it ideal for those pursuing professional qualifications while enhancing workplace performance. The course also bridges the gap between governance, risk, and audit functions, providing a holistic approach rarely found in traditional training.

Additionally, this internal audit workshop and seminar is tailored for both corporate and government environments, ensuring relevance across sectors. Whether delivered in-person or as an internal audit training course online, the program ensures measurable skill development, practical application, and immediate organizational impact.
