Palo Alto Networks: A Comprehensive Training Course

Ref: 39_78515 **Date:** 13 – 17 September 2027 **Location:** Athens **Fees:** 6700 Euro

Palo Alto Networks: A Comprehensive Training Course Overview:

The "Palo Alto Networks: Comprehensive Training Course" is a meticulously crafted program that delves deep into the heart of Palo Alto's renowned cybersecurity infrastructure. From the basics of Firewall Essentials: Configuration and Management to the intricate details of the Palo Alto Networks Administrator's Guide, this course encompasses it all. Participants will gain a robust understanding of EDU-210 and EDU-110 Courses, Palo Alto Threat Detection and Prevention, and many more critical aspects. With a sharp focus on Best Practice Settings for Palo Alto, High Availability Firewall Design, and Interface Configuration for Palo Alto Deployment, this course promises a hands-on, immersive experience.

Target Audience:

- Network Security Engineers
- Cybersecurity Analysts
- Firewall Administrators
- IT Infrastructure Managers
- Professionals aiming for Palo Alto Networks Certification

Targeted Organizational Departments:

- IT and Cybersecurity
- Network Administration
- Infrastructure Management

Targeted Industries:

- Financial Services
- Healthcare
- E-commerce
- Government Institutions
- Telecommunications

Course Offerings:

Participants will acquire skills and knowledge in:

- Deep dive into Firewall Implementation Design
- Mastering Palo Alto VM-Series Deployment
- Comprehending Template Stacks Administration
- Unpacking Traffic Log Interpretation and App-ID Security Rules
- Proficiency in Palo Alto Systems Update Process

Training Methodology:

The "Palo Alto Networks: Comprehensive Training Course" employs a blend of theoretical and practical training techniques. Leveraging case studies from the EDU-110 Comprehensive Training Guide and Best Palo Alto EDU-210 Course Online, participants will simulate real-world scenarios. Group work sessions facilitate peer-to-peer learning, while interactive sessions led by experts in Palo Alto Advanced Firewall Management Training ensure the comprehension of intricate topics. Feedback sessions employ tools like Palo Alto Packet Capture Configuration for a more in-depth analysis.

Course Toolbox:

- Palo Alto Networks Administrator's Guide
- Template Stacks Administration Checklists
- Palo Alto VM-Series Deployment Software
- Online resources for Traffic Log Analysis in Palo Alto Systems
- Workbooks for Palo Alto Next-Generation Firewall Workshop

Course Agenda:

Day 1: Introduction to Palo Alto Networks Firewall Essentials

- **Topic 1:** Understanding the Palo Alto Networks Firewall Essentials
- **Topic 2:** How Palo Alto Networks products work together to detect and prevent threats
- **Topic 3:** Fundamental functions on the management and data planes of Palo Alto Networks
- **Topic 4:** Administrator's Guide: Configuration essentials and best practices
- **Topic 5:** Policy evaluation based on the packet flow architecture
- **Reflection & Review:** Overview of Palo Alto Networks products and their initial configuration

AGILE LEADERS
Training Center

Day 2: Designing Firewall Solutions

- **Topic 1:** Designing firewall implementations to meet business requirements
- **Topic 2:** Implementing firewalls in High Availability for business needs
- **Topic 3:** Identifying the right interface types and configurations for specific network deployments
- **Topic 4:** Scalable solutions using template stacks for administering firewalls
- **Topic 5:** Device group hierarchy as another solution for scalable firewall administration
- **Reflection & Review:** Crafting solutions that align with business needs and growth

Day 3: Deployment, Configuration, and Logging

- **Topic 1:** Deploying firewalls in private or public cloud environments VM-Series
- **Topic 2:** Mitigating resource exhaustion due to denial-of-service
- **Topic 3:** Deciphering application meanings in the Traffic log
- **Topic 4:** Security rule creation: Implementing App-ID without relying on port-based rules
- **Topic 5:** Necessary steps to deploy a next-generation firewall
- **Reflection & Review:** Ensuring secure and efficient network traffic management

Day 4: Updates, Integration, and Advanced Configurations

- **Topic 1:** Updating a Palo Alto Networks system to its latest version
- **Topic 2:** Configuration management for operational stability
- **Topic 3:** Critical HA functions: link monitoring, path monitoring, HA1, HA2, and HA3
- **Topic 4:** Firewall integration with AutoFocus and its verification
- **Topic 5:** Relationship dynamics between Panorama and devices for dynamic updates
- **Reflection & Review:** Ensuring systems are up-to-date, stable, and integrated

Day 5: Troubleshooting and Advanced Concepts

- **Topic 1:** Configuration requisites for packet capture
- **Topic 2:** Identifying threat prevention components for different attack scenarios
- **Topic 3:** Bandwidth control on a per-application basis
- **Topic 4:** DNAT-based security rule configuration
- **Topic 5:** Difference between security configurations for data vs. management planes
- **Reflection & Review:** Recap and best practices for optimizing Palo Alto Networks solutions

How This Course is Different from Other Palo Alto Networks Course:

The "Palo Alto Networks: Comprehensive Training Course" is not just another training program. It integrates the theoretical foundations from the EDU-110 Comprehensive Training Guide with the hands-on expertise of the Palo Alto Firewall Training Course. Our program prioritizes real-world application, ensuring participants are not just knowledgeable but are also competent in applying their knowledge. Through our rigorous focus on Traffic Log Analysis Training in Palo Alto Systems and the Palo Alto Advanced Firewall Management Training, we guarantee a depth of understanding unmatched by other courses.
