

Certified International Procurement Manager (CIPM Level 2) Exam Prep

6 – 10 September 2027
New York

Certified International Procurement Manager (CIPM Level 2) Exam Prep

Ref: 103600633_82263 **Date:** 6 – 10 September 2027 **Location:** New York **Fees:** 12000 Euro

Course Overview:

The Certified International Purchasing/Procurement Manager CIPM, Level 2 Exam Prep course is an advanced professional development program for experienced purchasing, procurement, and supply chain professionals preparing for managerial-level certification. The course combines structured CIPM Level 2 Exam Prep with practical Procurement Management Training, Purchasing Management Training, and Strategic Procurement Training.

The program develops the competencies expected of a Certified International Procurement Manager or Certified International Purchasing Manager, including procurement leadership, spend analysis, strategic sourcing, category management, advanced negotiation, contract administration, supplier relationship management, international sourcing, and procurement performance improvement. CIPM Level 2 is positioned as an advanced managerial qualification for professionals who already understand procurement fundamentals and are preparing to lead procurement teams, optimize sourcing processes, and contribute strategically to organizational objectives.

The course structure reflects the principal CIPM knowledge areas presented in the supporting materials, including leadership and management, procurement process improvement, spend management, sourcing, category strategy, international contracting, contract changes, and multiple dimensions of supplier relationship management.

Through targeted revision, procurement case studies, scenario-based questions, and mock examination practice, this CIPM Certification Training helps participants identify knowledge gaps, strengthen managerial decision-making, and approach the certification examination with greater confidence.

Target Audience:

- Procurement Managers
- Purchasing Managers
- Strategic Sourcing Managers
- Category Managers
- Contract Managers
- Supplier Relationship Managers
- Supply Chain Managers
- Senior Procurement Specialists

Targeted Organizational Departments:

- Procurement and Purchasing
- Strategic Sourcing and Category Management
- Supply Chain Management
- Contracts and Commercial Management
- Supplier and Vendor Management
- Finance and Cost Control
- Operations and Production
- Materials and Inventory Management
- Logistics and International Trade
- Project Procurement
- Governance, Risk, and Compliance
- Digital Procurement and Procurement Analytics

Targeted Industries:

- Oil, Gas, Energy, and Utilities
- Manufacturing and Industrial Production
- Construction, Engineering, and Infrastructure
- Government and Public-Sector Procurement
- Banking and Financial Services
- Healthcare and Pharmaceuticals
- Telecommunications and Technology
- Aviation, Transport, and Logistics
- Retail, FMCG, and Distribution
- Automotive and Heavy Equipment
- Mining and Natural Resources
- Professional and Business Services

Course Offerings:

By the end of this course, participants will be able to:

- Explain the CIPM Level 2 body of knowledge, exam structure, and principal competency areas.
- Align procurement strategies with corporate objectives and operational priorities.
- Lead procurement teams using appropriate leadership, communication, and change-management approaches.
- Streamline procurement workflows and improve policy, governance, and process control.
- Conduct spend analysis and identify cost-saving, compliance, and consolidation opportunities.
- Apply strategic sourcing and category management frameworks to major spend areas.
- Evaluate suppliers using commercial, operational, financial, quality, and risk criteria.
- Calculate and interpret total cost of ownership, price structures, cost drivers, and supplier financial information.
- Prepare and conduct complex procurement negotiations using BATNA, ZOPA, power analysis, and concession planning.
- Administer commercial and service contracts after award, including changes, claims, performance monitoring, and closeout.
- Develop effective supplier relationship management, segmentation, development, and performance-improvement strategies.
- Evaluate international sourcing options, landed costs, payment methods, foreign exchange exposure, and cross-border risks.
- Apply Procurement Risk Management and Procurement Performance Management methods.
- Answer recall, comprehension, and application-based multiple-choice questions more effectively.
- Develop a structured revision plan for the Professional Procurement Manager Certification Exam Preparation.

Training Methodology:

The Certified International Procurement Manager CIPM Level 2 Training Course uses an exam-focused and workplace-oriented methodology. Each module begins with a concise review of the relevant CIPM knowledge domain, followed by practical examples showing how the concepts apply to procurement management decisions.

Participants work through case studies involving strategic sourcing, supplier rationalization, cost increases, contract changes, negotiation breakdowns, international purchasing, and supplier performance. Group exercises are used to compare procurement options, analyze risks, and justify recommendations. The training also includes facilitated discussions on how experienced procurement professionals should distinguish between technically possible answers and the best managerial answer in a certification examination.

Question practice reflects common professional certification formats, including closed-stem questions, sentence-completion questions, EXCEPT questions, and MOST, LEAST, or BEST-answer questions. The exam materials also distinguish between recall, comprehension, and application-level questions.

Participants receive feedback on reasoning errors, weak knowledge areas, time allocation, and question interpretation. The final day includes a structured CIPM Exam Preparation Course review, timed mock questions, answer analysis, and an individual study plan. The methodology therefore supports both examination readiness and practical procurement leadership capability.

Course Toolbox:

- CIPM Level 2 body-of-knowledge reference map
- Procurement leadership competency checklist
- Procurement process-mapping example
- Spend-analysis classification model
- Category strategy structure
- Supplier segmentation matrix
- Supplier qualification and evaluation criteria
- Supplier performance scorecard example
- Total cost of ownership calculation example
- Cost and price analysis examples
- Supplier financial-health review example
- Negotiation planning framework
- BATNA and ZOPA analysis example
- Contract administration checklist
- Contract change and claim-analysis example
- International sourcing risk checklist
- Total landed cost calculation example
- Procurement risk register example
- Procurement KPI and dashboard examples
- Practice multiple-choice questions
- Mock examination and answer-review guide
- Personal CIPM revision-planning template

Important note: Commercial software, e-procurement platforms, analytics systems, AI tools, and other technology products are not provided as part of the course. The training provides professional insights, demonstrations, selection criteria, and examples of tools relevant to procurement management.

Course Agenda:

Day 1: CIPM Modules 1–3 — Leadership, Procurement Process, and Spend Analysis

- **Topic 1:** CIPM Exam Framework, Module Structure, and Study Priorities
- **Topic 2:** Module 1 — Leadership Styles, Team Dynamics, Communication, and Influence
- **Topic 3:** Module 1 — Managing Change, Motivation, Collaboration, and Procurement Teams
- **Topic 4:** Module 2 — Planning, Organizing, Leading, and Controlling Procurement Operations
- **Topic 5:** Module 2 — Streamlining Procurement Processes and Improving Organizational Performance
- **Topic 6:** Module 3 — Spend Management, Spend Classification, Data Visibility, and Compliance
- **Reflection & Review:** Review Modules 1–3 through targeted multiple-choice questions, identify weak areas, and record key definitions, processes, and managerial principles for revision.

Day 2: CIPM Modules 4–6 — Sourcing, Strategic Sourcing, and Category Management

- **Topic 1:** Module 4 — Supply-Base Analysis, Existing and New Sources, and Supplier Evaluation
- **Topic 2:** Module 4 — Procurement Methods, Buying Strategies, Forecasts, and Financial Considerations
- **Topic 3:** Module 5 — Strategic Sourcing Conditions, Market Analysis, and Supplier Strategies
- **Topic 4:** Module 5 — Risk-Benefit Analysis, Sourcing Plans, and Implementation Roadmaps
- **Topic 5:** Module 6 — Strategic Sourcing and Category Management Principles
- **Topic 6:** Module 6 — Spend Categories, Market Positioning, Supplier Segmentation, and Category Plans
- **Reflection & Review:** Complete module-based questions on sourcing and category management, distinguish operational sourcing from strategic sourcing, and prepare a summary map of Modules 4–6.

Day 3: CIPM Modules 7–8 — Advanced Negotiation and International Sourcing

- **Topic 1:** Module 7 — Competencies of a World-Class Procurement Negotiator
- **Topic 2:** Module 7 — Negotiation Planning, Objectives, BATNA, ZOPA, Power, and Concessions
- **Topic 3:** Module 7 — Persuasion, Conflict Resolution, Price-Increase Negotiations, and Closing
- **Topic 4:** Module 8 — Global Supplier Research, Benchmarking, and Cross-Cultural Working Skills
- **Topic 5:** Module 8 — Foreign Exchange, International Payments, Regulations, and Trade Intermediaries
- **Topic 6:** Module 8 — International Contracts, Logistics Providers, Sourcing Risks, and Business Cases
- **Reflection & Review:** Apply negotiation and international sourcing concepts to scenario-based exam questions, then review incorrect answers using elimination and best-answer techniques.

Day 4: CIPM Modules 9–14 — Contract Administration and Supplier Relationship Management

- **Topic 1:** Module 9 — Post-Award Orientation, Service Contract Administration, and Performance Control
- **Topic 2:** Module 10 — Contract Changes, Change Orders, Equitable Adjustments, and Constructive Changes
- **Topic 3:** Module 11 — Supplier Relationship Management, SWOT Analysis, and Supply-Base Rationalization
- **Topic 4:** Module 12 — Supplier Collaboration, Trust, Continuous Improvement, and Strategic Alliances
- **Topic 5:** Module 13 — Supplier Qualification Plans, Requirements Gathering, and Supplier Evaluation
- **Topic 6:** Module 14 — Supplier Performance Reviews, Site Visits, Scorecards, and Improvement Actions
- **Reflection & Review:** Complete integrated questions covering contract administration and supplier relationship management, then classify errors by Modules 9–14 for focused revision.

Day 5: CIPM Exam Preparation Guide, Mock Exam, and Test Strategies

- **Topic 1:** CIPM Body of Knowledge Review and Module-by-Module Revision Planning
- **Topic 2:** CIPM Question Formats: Closed-Stem, Sentence Completion, EXCEPT, and MOST/LEAST/BEST
- **Topic 3:** Understanding Recall, Comprehension, and Application-Level Questions
- **Topic 4:** Exam Strategies: Reading the Stem, Eliminating Distractors, and Selecting the Best Managerial Answer
- **Topic 5:** Timed CIPM Mock Examination with Module-Based Question Distribution
- **Topic 6:** Mock Exam Analysis, Knowledge-Gap Prioritization, and Final Study Schedule
- **Reflection & Review:** Participants calculate performance by module, identify recurring reasoning errors, and prepare a final exam-readiness plan covering revision time, question targets, and exam-day pacing.

FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Participants should preferably have practical experience in purchasing, procurement, contracts, or supply chain management and a working knowledge of procurement fundamentals. CIPM Level 2 is designed for professionals progressing toward managerial responsibilities.

Some program documents indicate that CIPM candidates should have five or more years of purchasing or supply chain experience and may be expected to have completed CIPP Level 1, although exemptions may be considered for highly experienced procurement managers. Another program outline identifies CIPP completion, relevant experience, and an associate-level degree or higher as typical entry considerations. Candidates should verify the current admission requirements directly with the certification body or authorized examination provider.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans five days, approximately 20-25 hours of instruction.

What should candidates expect from the CIPM Level 2 examination?

The examination is generally described as a multiple-choice professional certification examination covering managerial procurement knowledge and practical application. The supporting materials show differences between providers: one brochure describes an online examination with 80 multiple-choice questions completed in two hours, while several other program documents specify a three-hour multiple-choice examination.

Candidates should therefore confirm the current examination duration, number of questions, delivery method, passing requirements, and eligibility rules with their approved certification provider before registering.

How This Course is Different from Other Certified International Purchasing/Procurement Manager Courses:

This Certified International Purchasing/Procurement Manager CIPM, Level 2 Exam Prep course is structured around managerial application rather than simple content review. It does not treat CIPM preparation as a memorization exercise. Instead, it connects every major exam domain to a realistic procurement decision, such as how to respond to supplier price increases, restructure a category, administer contract changes, assess global sourcing exposure, or improve supplier performance.

The course integrates the broader ten-module procurement framework—covering the procurement cycle, cost analysis, negotiation, commercial contracting, supplier management, international sourcing, e-procurement, strategic planning, performance, and risk—with the more specific CIPM Level 2 modules of leadership, spend management, strategic sourcing, category management, contract administration, and supplier relationship management.

It also provides dedicated preparation for professional multiple-choice question formats and cognitive levels. Participants practise distinguishing recall questions from comprehension and application questions, rather than relying only on theoretical reading.

The result is an Advanced CIPM Certification Training for Purchasing Managers that supports two outcomes: stronger examination readiness and more effective performance as a procurement manager. It is therefore suitable both as a Corporate CIPM Level 2 Training for Procurement Teams and as an individual Professional Procurement Manager Certification Exam Preparation program.
