Tbilisi

Applied Sociology for Communication and Public Relations

Ref: 106_88084 **Date:** 28 June – 2 July 2027 **Location:** Tbilisi **Fees:** 5000 Euro

Overview

Public communication initiatives often fail when campaigns overlook structural community dynamics, cultural belief systems, and shifting audience loyalties. This course equips practitioners with applied sociology for communication and public relations to decode demographic trends, group behavior, and social institutions. Participants master social network analysis, qualitative research methodologies, framing theory analysis, and stakeholder sentiment analysis to build culturally resonant campaigns that align institutional messaging with community values. Professionals leave with actionable stakeholder mapping matrices, narrative intervention toolkits, and ethical communication frameworks. This course is delivered by Agile Leaders Training Center.

Who Should Attend

- Professionals responsible for leading organizational messaging, stakeholder engagement, and reputation management strategy.
- Specialists responsible for community relations, public affairs outreach, and local stakeholder partnerships.
- Managers responsible for crisis communication, brand trust protection, and public issue monitoring.
- Researchers responsible for social listening, public sentiment evaluation, and media discourse audits.
- Officers responsible for social impact reporting, civic engagement initiatives, and cultural advocacy programs.

Departments and Industries

This programme serves communications and external affairs teams across diverse organizational environments.

- Corporate Communications Divisions in Energy and Infrastructure Enterprises
- Public Relations and External Affairs Units in Financial and Professional Services
- Community Engagement Teams in Telecommunications and Technology Firms
- Patient Advocacy and Stakeholder Relations Offices in Healthcare Networks
- Institutional Relations Departments in Higher Education and Research Organizations

Learning Objectives

By the end of this course, participants will be able to:

- Apply sociological frameworks to dissect group dynamics and institutional communication barriers.
- Analyse media discourse using framing theory analysis to identify emergent public perceptions.
- Build stakeholder influence maps using social network analysis to track informal opinion leaders.
- Diagnose cultural misalignments within institutional campaigns to mitigate reputational vulnerability during crises.
- Evaluate public relations campaign evaluation metrics using mixed sociological measurement instruments.
- Construct narrative intervention strategies that drive sustained civic engagement and social capital formation.

Course Agenda

Day 1: Sociological Foundations in Public Communication

- Institutional Theory Audits using Scott Three Pillars Framework
- Social Stratification Mapping using Bourdieu Cultural Capital Models
- Public Sphere Discourse Evaluation using Habermas Deliberative Frameworks
- Normative Media Assessment using Social Responsibility Theory Matrices
- Cultural Dimension Diagnostic using Hofstede Societal Value Indices

Day 2: Group Dynamics, Social Identity, and Media Framing

- In-Group Cohesion Audits using Tajfel Social Identity Formulation
- Narrative Positioning Design using Entman Framing Theory Analysis Sheets
- Issue Salience Mapping using McCombs Agenda-Setting Protocols
- Public Risk Perception Analysis using Douglas Cultural Theory of Risk
- Counter-Narrative Development using Symbolic Interactionism Toolkits

Day 3: Social Networks, Influence Patterns, and Community Capital

- Community Influence Mapping using Granovetter Strength of Weak Ties Model
- Network Topology Audits using Freeman Centrality Metric Calculations
- Diffusion Tracking Protocols using Rogers Innovation Adoption Curves
- Social Capital Assessment using Putnam Bridging and Bonding Indicators
- Echo Chamber Identification using Homophily Clustering Algorithms

Day 4: Applied Sociology in Crisis Communication and Conflict Resolution

- Crisis Contextualization using Coombs Situational Crisis Communication Theory
- Social Vulnerability Audits using Community Resilience Assessment Metrics
- Moral Panic Diagnosis using Cohen Deviance Amplification Models
- Reputational Recovery Planning using Benoit Image Restoration Typology
- Restorative Dialogue Structuring using Nonviolent Communication Protocols

Day 5: Research Integration, Campaign Strategy, and Applied Practice

- Audience Sentiment Extraction using Grounded Theory Qualitative Coding
- Civic Engagement Measurement using Arnstein Ladder of Participation
- Public Relations Campaign Evaluation using AMEC Integrated Evaluation Framework
- Sociological Ethical Governance using Code of Ethics Alignment Audits
- Capstone Applied Sociology Campaign Simulation and Stakeholder Strategy Defense

Practical Exercises

Participants complete hands-on activities to resolve complex communication scenarios and design audience engagement strategies.

- Suggested activity: Construct an institutional stakeholder map applying social network analysis to identify key community gatekeepers.
- Suggested activity: Perform a discourse framing review on a contentious corporate announcement using framing theory analysis.
- Suggested activity: Design an empirical public relations campaign evaluation matrix assessing community social capital and trust indicators.

FAQs

How does applied sociology enhance traditional corporate communication?

Applied sociology introduces systematic diagnostic tools to evaluate cultural dynamics, social networks, and group identities, helping organizations anticipate audience interpretations rather than relying solely on intuitive messaging.

What analytical frameworks are applied during the course?

Participants employ established models including social identity theory, framing theory analysis, structural centrality indices, and situational crisis communication protocols to diagnose and influence stakeholder perception.

Is this syllabus suitable for both corporate and public sector contexts?

Yes. The methodologies address institutional reputation, community trust, and stakeholder engagement across corporate enterprises, healthcare systems, civic entities, and regulated industries.

Conclusion

Participants complete the course prepared to incorporate empirical sociological models into organizational messaging and crisis response. By adopting rigorous qualitative research, social network analysis, and structural stakeholder mapping, communication professionals ensure their campaigns foster enduring public trust, navigate social tension, and generate measurable impact across diverse communities.
