Strategic Insights to Governance, Risk Management, and Compliance

Ref: 36252_94007 **Date:** 4 – 8 July 2027 **Location:** Riyadh **Fees:** 7500 Euro

Overview

Navigating modern organizational responsibilities requires aligning executive leadership, risk appetite, and regulatory mandates into a coherent management system. This five-day course delivers strategic insights to governance, risk management, and compliance across complex organizational structures. Participants examine the impact of leadership tone, the direct and indirect expenses of non-compliance, and the practical implementation of internal control frameworks. Through detailed case evaluations and diagnostic reviews, executives and managers learn to protect enterprise value, strengthen accountability, and reinforce ethical corporate conduct. This course is delivered by Agile Leaders Training Center.

Who Should Attend

- Executive officers and managing directors seeking stronger oversight mechanisms.
- Risk managers and compliance officers responsible for control architecture.
- Board members and corporate secretaries directing governance practices.
- Finance executives and internal auditors monitoring financial reporting controls.
- Department heads and integrity managers shaping ethical business practices.

Departments and Industries

This program supports professionals safeguarding regulatory posture, operational resilience, and institutional integrity.

- Corporate Governance and Board Support Secretariats
- Risk Management and Enterprise Compliance Units
- Finance, Internal Audit, and Financial Reporting Teams
- Information Technology Governance and Data Security Divisions
- Banking, Manufacturing, Technology, and Regulated Public Services

Learning Objectives

By the end of this course, participants will be able to:

- Structure integrated governance, risk management, and compliance architectures that reflect institutional strategy.
- Establish operational controls that mitigate regulatory penalties and indirect organizational costs.
- Deploy enterprise risk management methodologies to classify, quantify, and mitigate systemic exposures.
- Design internal control frameworks that secure accuracy across financial reporting controls.
-

Evaluate board governance models, stakeholder expectations, and executive compensation structures.
- Formulate an integrity-driven corporate culture supported by measurable conduct standards.

Course Agenda

Day 1: Foundations of Corporate Governance and Integrity

- Core dimensions of governance, risk management, and compliance across enterprise operations
- Evaluating corporate culture: leadership behavior, informal norms, and conduct risks
- Operational transparency: sustaining statutory alignment, candid disclosure, and honesty
- Diagnosing organizational failures: structural breakdowns and recovery strategies
- Establishing clear governance architecture across operational business lines

Day 2: Business Ethics and Leadership Tone

- Establishing compliance programs that support practical ethical business practices
- Tone at the top: translating executive commitments into front-line operational behaviors
- Cost modeling: assessing the direct penalties and indirect operational drag of non-compliance
- Designing structured reporting channels and internal whistleblowing safeguards
- Evaluating corrective action plans following compliance breaches

Day 3: Enterprise Risk Management and Internal Controls

- Enterprise risk management architecture: risk taxonomies, tolerances, and appetite statements
- Systemic financial vulnerabilities and institutional risk response strategies
- Designing internal control frameworks to safeguard core processes and reporting pipelines
- Mitigating operational risk exposures across IT, human capital, and third-party vendors
- Monitoring key risk indicators and establishing automated escalation thresholds

Day 4: Board Oversight and Strategic Performance

- Board committee structures: responsibilities for audit, risk, and nomination mandates
- Societal responsibilities, stakeholder scrutiny, and corporate sustainability strategy
- Executive accountability: evaluation methods, succession pipelines, and compensation metrics
- Aligning operational performance metrics with long-term strategic objectives
- Oversight standards for statutory audit routines and financial reporting controls

Day 5: Power Dynamics and Future Governance Models

- Stakeholder expectations: engaging active shareholders and institutional investors
- Modernizing corporate board structures for distributed accountability and independence
- Director remuneration structures, proxy voting trends, and fiduciary duties
- Crisis governance: organizational coordination during operational and reputational disruptions
- Emerging governance trends: addressing automated decisions, ESG mandates, and cross-border obligations

Practical Exercises

Participants apply governance and risk analysis methods to simulated corporate scenarios.

- Suggested activity: Conduct a corporate culture audit to uncover compliance vulnerabilities and conduct risks.
- Suggested activity: Construct an enterprise risk management register categorizing operational and financial exposures.
- Suggested activity: Design a board review scorecard to evaluate executive compensation alignment and governance effectiveness.
- Suggested activity: Build an internal control testing checklist to verify the integrity of financial reporting mechanisms.

FAQs

How does this course address ethical corporate culture?

The curriculum examines behavioral drivers within organizations, analyzing how executive tone, performance incentives, and accountability structures combine to reinforce ethical business practices.

What risk management frameworks are examined during the sessions?

The course evaluates established enterprise risk management methodologies, emphasizing practical risk identification, tolerance definition, control mapping, and executive escalation protocols.

How are board oversight and executive compensation evaluated?

Sessions examine committee responsibilities, independent director functions, transparent succession planning, and the design of executive remuneration frameworks aligned with shareholder value.

Conclusion

Participants conclude this program equipped with strategic tools to integrate oversight, control, and ethics across operational workflows. By mastering structured compliance mechanisms and robust risk methodologies, leaders safeguard institutional reputation and ensure lasting organizational stability.
